1 About these instructions

1.1 Target group

These instructions are intended for the following target groups:

– Trained electrical specialists charged with mounting the cable routing systems

– Electrical planners and engineers charged with the planning of cable routing systems

Electrical work may only be carried out by specialist personnel with electrical training.

Installation electrotechnical expertise

1.2 Relevance of these instructions

These instructions are based on the standards valid at the time of compilation (February 2022).

Please read the instructions carefully before starting mounting. We will not accept any warranty claims for damage caused through non-observance of these instructions.

Any images are intended merely as examples. Mounting results may look different.

These instructions are intended as assistance in the mounting, maintenance and overhauling of cable routing systems and makes no claims as to completeness.

All the documents supplied with the product must be stored in an easily accessible location, so as to be available when information is required.

The manufacturer will not accept liability for damage caused through non-observance of these mounting instructions.

Regional and seasonal factors were not taken into account.

1.3 Types of warning information

WARNUNG	**Type of risk!** Shows a risky situation. If the safety instruction is not observed, then serious or fatal injuries may occur.

ACHTUNG	**Type of risk!** Shows a hazardous situation. If the safety instruction is not observed, then damage to the product or the surroundings may occur.

Note!   *Indicates important information or assistance.*

1.4 Basic standards and regulations

– DIN EN 50085, VDE 0604-2-1:2012-09 "Cable trunking systems and cable ducting systems for electrical installations"

– DIN VDE 0100 – Part 410: Protection measures

– DIN VDE 0100 – Part 520: Selection and erection of electrical equipment/Protection against external electrical influences (EMC)

– DIN VDE 0105: Operation of electrical installations (general requirements)

– DIN VDE 0107: Heavy-current installations in medical rooms

– DIN VDE 0298: Application of cables and cords in power installations

– EN 50310: Telecommunications bonding networks for buildings and other structures

– EN 50174: Information technology – Cabling installation

– DIN 4102: Fire Behaviour of Building Materials and Building Components

– EN 50642: Cable management systems – Test method for content of halogens

– Safety regulations for office workstations

– Protection against unauthorised access, e.g. in administrations, military or similar

– Shock protection for protection areas for civil defence

1.5 Applicable documents

– Declaration of conformity, see https://www.obo.de/service/downloads/konformitaetserklaerungen/gebaeudeinstallation/leitungsfuehrungs-systeme/

– Symbol approvals, see https://www.obo.de/service/downloads/zertifikate/gebaeudeinstallation/leitungsfuehrungs-systeme/

2 Intended use

Cable routing systems are manufactured according to the standard and may only be used for routing cables. Electrical installation devices (e.g. sockets, data technology supports or multimedia connections) with a rated voltage of up to 400 V can be installed in the cable routing systems. Depending on the version, the cable routing systems are designed for use at different ambient temperatures. The cable routing systems are approved for use in dry interior areas.

3 Safety

3.1 General safety information

Observe the following general safety information:

– Contact with electrical current can lead to an electric shock.

– Risk of cutting from plate edges.

– Electrical work may only be carried out by specialist personnel with electrical training.

– Cable routing systems may not act as supports for people or heavy objects.

– Observe the fire protection specifications when erecting systems for the maintenance of electrical function.

– Improper mounting or mounting deviating from the manufacturer's specifications may cause the cable routing system to collapse.

– Depending on the version, the cable routing systems are designed for use at different ambient temperatures.

– Do not stand on painted or coated surfaces, in order to prevent damage to the surfaces.

3.2 Personal protective equipment

List of personal protective equipment to be used:

Use hand protection

Wear safety shoes

Wear eye protection

3.3 Necessary tools

List of tools to be used:

– Screwdriver

– Saw

– Drill

– Battery-operated screwdriver

4 Mounting the WDK cable trunking

4.1 WDK mini trunking
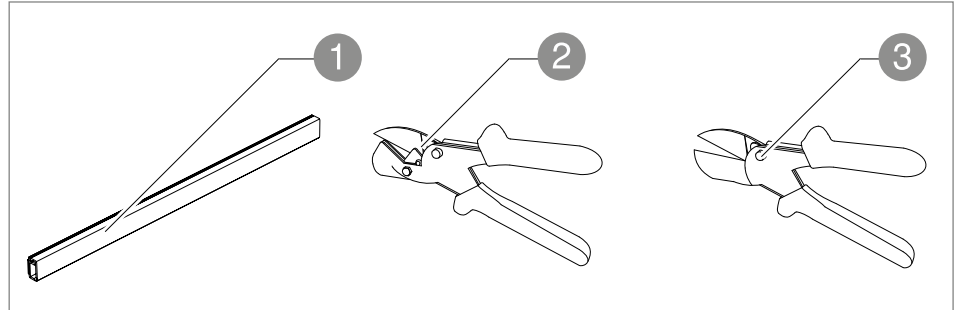

4.1.1 Mini trunking system description

Fig. 1: Overview, WDK mini trunking

— ① WDK mini trunking

4.1.1.1 Accessories (optionally available):

— ② Shears for straight cuts (item no. 6028403)

— ③ Shears for mitre cuts (item no. 6028411)

The WDK mini trunking is used to route very small amounts of cables. The mini trunking is available in heights of 4 to 17 mm. With an adhesive film in the base area, mini trunking is suitable for direct mounting on the wall. Mini trunking is either equipped with a hinge cover or taper in the upper area of the WDK mini trunking to fix a cable. The main areas of application are administrative buildings, the commercial sector and industry. The plastic system is available in the colours pure white, cream white, traffic white and light grey. No fittings are available.

4.1.2 Mounting the WDK mini trunking
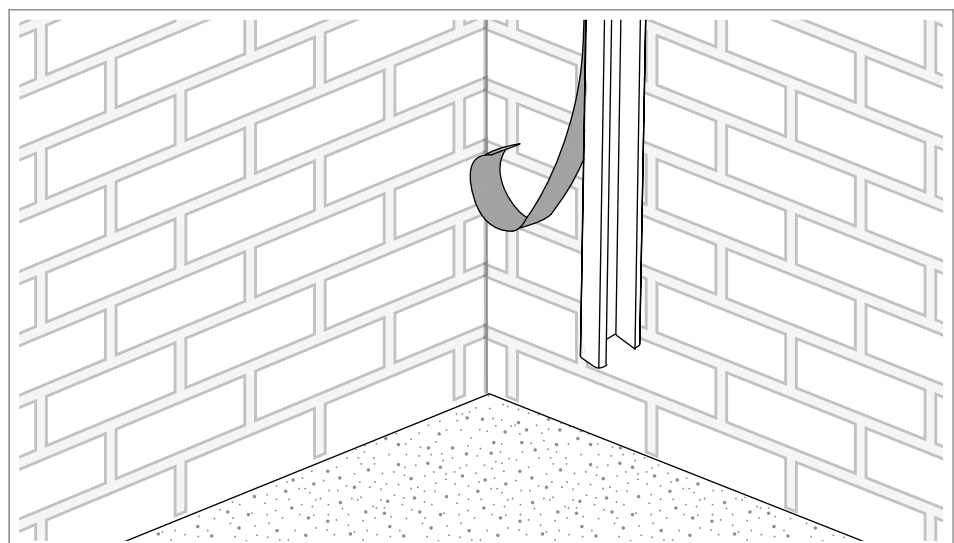

Fig. 2: Mounting the WDK mini trunking

1. Remove the protective film.

2. Stick the WDK mini trunking ❶ to a dust-free, adherent substrate.

Note!   *When cutting the WDK mini trunking, two different sets of shears are available (for straight and mitre cuts).*

Fig. 3: Straight cuts: Cutting the WDK mini trunking

3. Cut the WDK mini trunking in the desired position ❶ with the shears-for straight cuts ❷ .
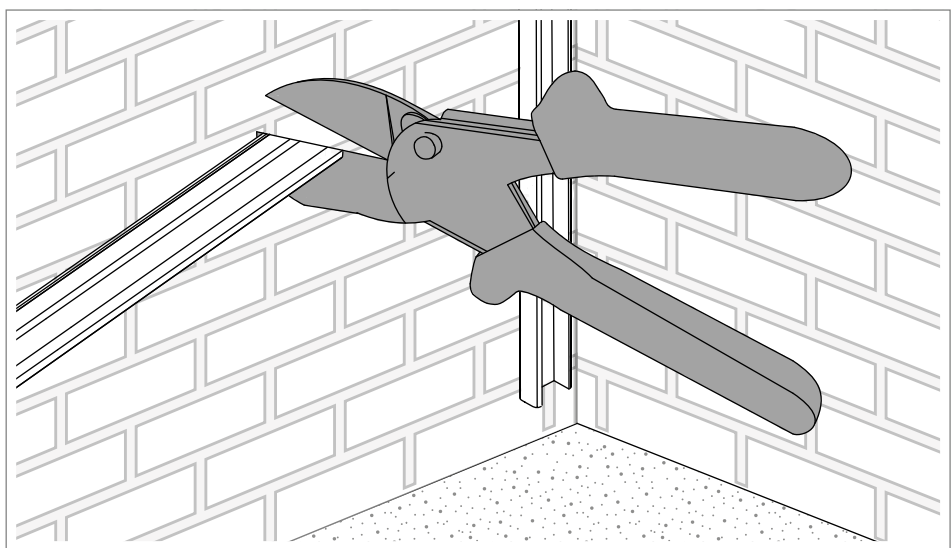

Fig. 4: Mitre cuts: Cutting the WDK mini trunking

4. Cut the WDK mini trunking in the desired position ❶ with the shears for mitre cuts ❸.
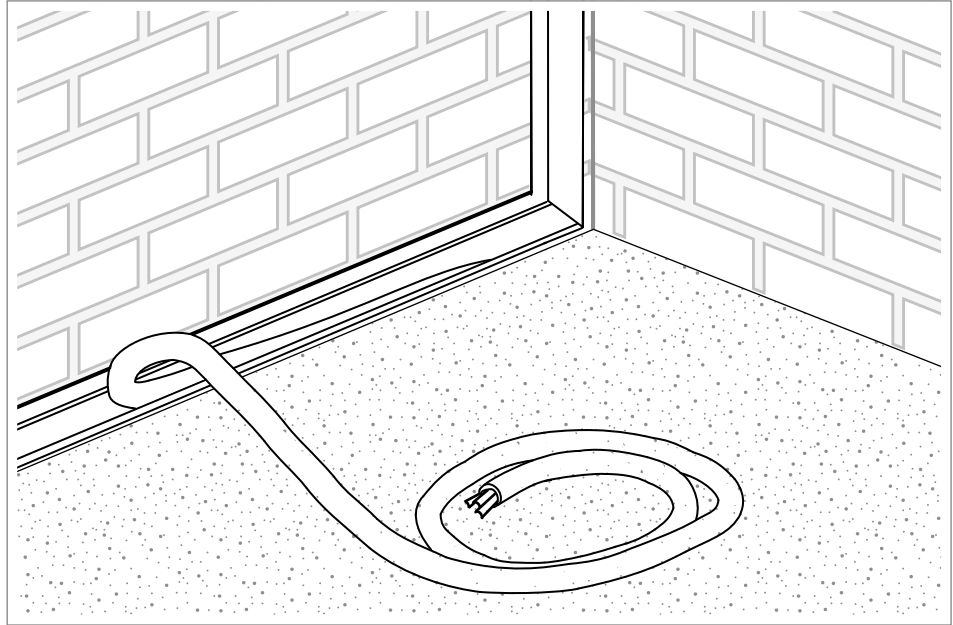

Fig. 5: Insert cables

5. Insert the cables in the WDK mini trunking ❶.

6. Engage the cover with the hinge function on the WDK mini trunking ❶.

4.2   WDK/WDKH plastic cable trunking systems

4.2.1   System description, WDK

**Fig. 6:** Overview, WDK cable trunking system
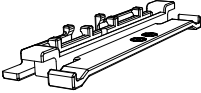

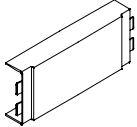

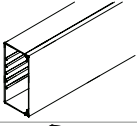

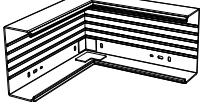

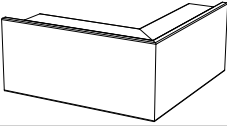

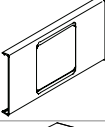

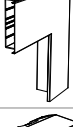

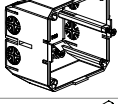

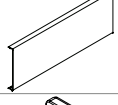

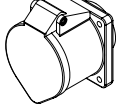

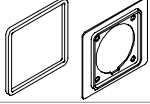

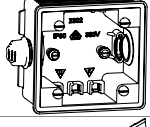

Various component parts belong to the WDK cable trunking system:
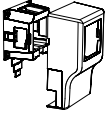

Note!   *Not every fitting is available for each type. The equipment of the individual WDK cable trunking systems varies.*

Note!   *The mounting of the halogen-free variant is identical. The difference is solely in the material properties.*

Item no.	Designation	Figure	Function
1	End piece		End piece for closing the WDK cable trunking at the trunking ends.

Item no.	Designation	Figure	Function
2	Cover clip		Cover clip for better and easier laying of the cables in the WDK cable trunking
3	T and cross piece cover T piece		T and cross piece to change the direction of WDK cable trunking. Available as cover fitting or fixed fitting.
4	WDK(H) cable trunking		WDK cable trunking for routing cables on the wall or ceiling. With base perforation in the trunking base for mounting directly on the wall/ceiling.
5	Internal corner cover Internal corner		Internal corner to change the direction of WDK cable trunking. Available as cover fitting or fixed fitting.
6	Joint cover		Joint cover for hiding cut edges and for smooth connection of trunking segments.
7	External corner cover External corner		External corner to change the direction of WDK cable trunking. Available as cover fitting or fixed fitting.
8	Cover for single device installation socket		Cover for closing a device installation socket with mounted socket in the WDK cable trunking.
9	Pipe adapter		Pipe adapter for transferring an installation pipe to the WDK cable trunking.
10	Flat angle cover Flat angle		Flat angle to change the direction of WDK cable trunking. Available as cover fitting or fixed fitting.
11	Device installation socket for Schuko sockets		Device installation socket for the installation of devices of support ring and support clamp design in WDK cable trunking of 60 mm trunking height.
12	Cover		Cover for closing the WDK cable trunking.
13	CEE connection unit		CEE socket for mounting in device installation sockets. Available with 16 A and 32 A.
14	Adapter flange		Adapter flange for mounting CEE sockets in a device installation socket.
15	Accessory socket for CEE socket		Device installation socket for the installation of a CEE socket in WDK cable trunking of 60 mm trunking height.
16	Partition		Partition to divide the WDK cable trunking for the installation of different voltage levels.

Item no.	Designation	Figure	Function
17	Device support		Device support for mounting on WDK cable trunking of the types WDK 12022, WDK 15030, WDK15040 and WDK 20050. The device support is only suitable for accepting Modul 45® devices.
18	Mounting aid		Mounting aid for the WDK cable trunking for single-handed mounting.

Tab. 1: Product overview, WDK cable trunking

The WDK cable trunking is used to simplify cable routing. Thanks to its base perforation, the WDK cable trunking is suitable for direct wall mounting. The core application is in administrative buildings, commercial areas and in industry. The plastic system is available in the colours stone white, cream white, light grey, pure white, sepia brown, jet black and traffic white.

The WDK cable trunking is available in different sizes. Together with the device installation sockets, the WDK cable trunking of 60 mm trunking height can be used as device installation trunking.

4.2.2 Mounting the WDK(H) cable trunking
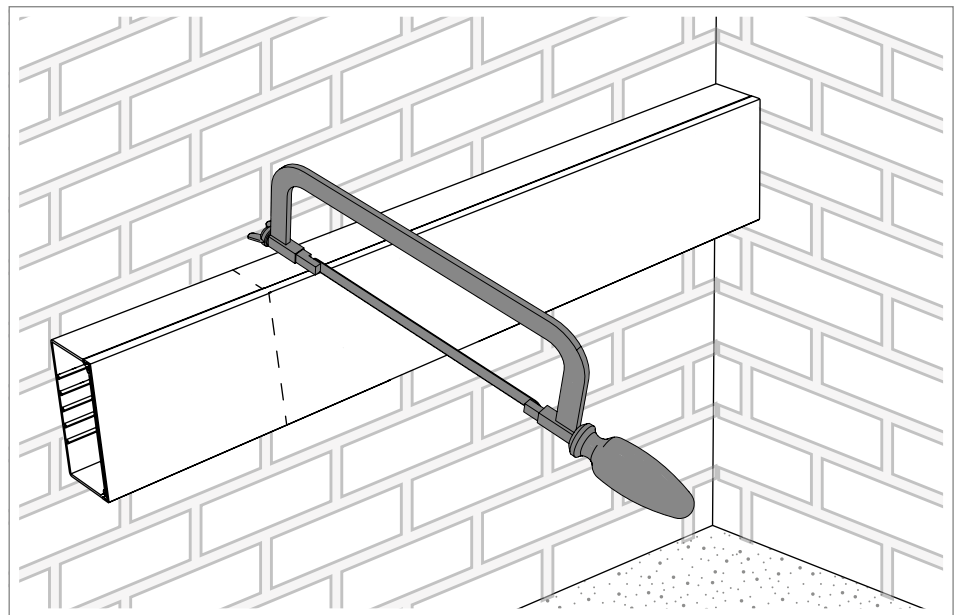

Fig. 7: Adjusting the WDK cable trunking

1. Adjust the WDK cable trunking ④ to the desired length using a suitable tool (e.g. saw).
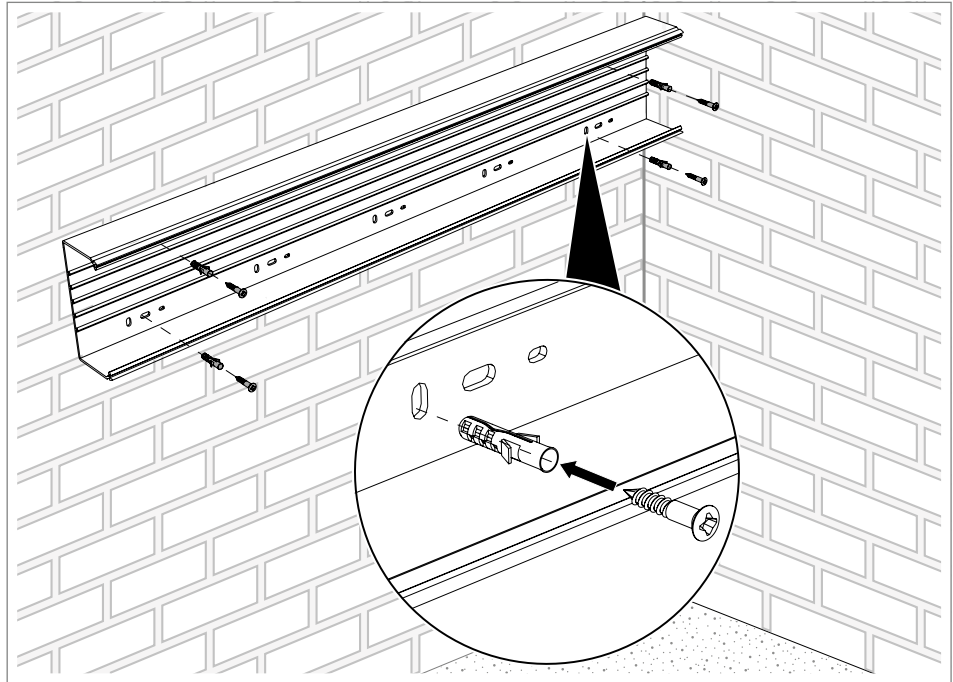

Fig. 8: Mounting the WDK cable trunking

2. Fasten the WDK cable trunking ❹ to the wall in the slots using suitable fastening material (e.g. screw and anchor).

4.2.2.1 Using a mounting aid

Mounting aid for the WDK cable trunking for single-handed mounting. Simply snap onto the mushroom profile in the base of the WDK cable trunking. For the WDK cable trunking type 4060 and higher.
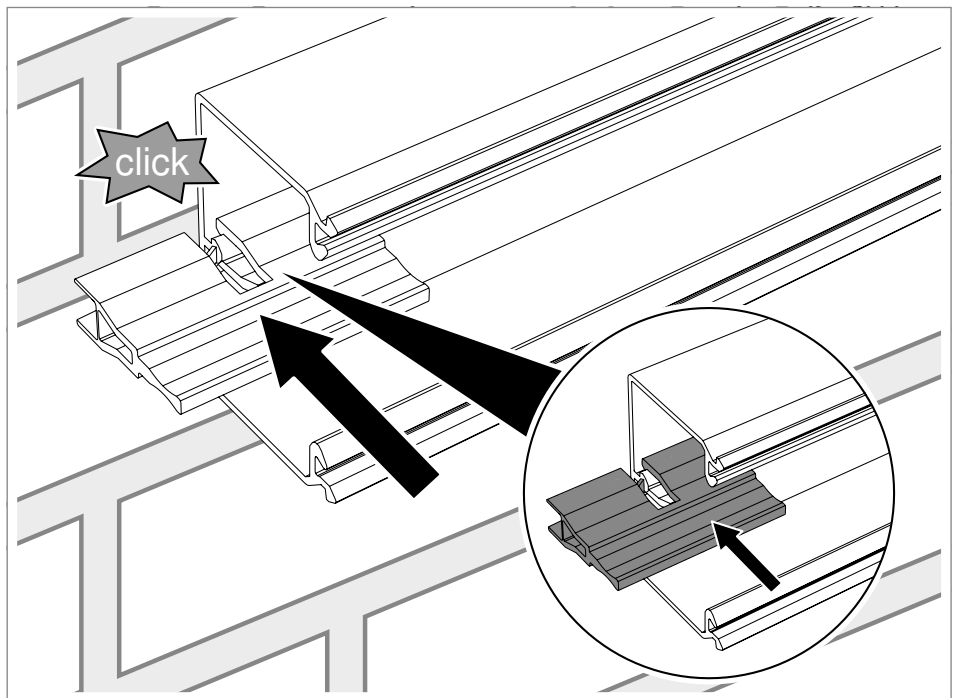

Fig. 9: Mounting the mounting aid

1. Snap the mounting aid ⑱ onto the mushroom profile in the base of the trunking.
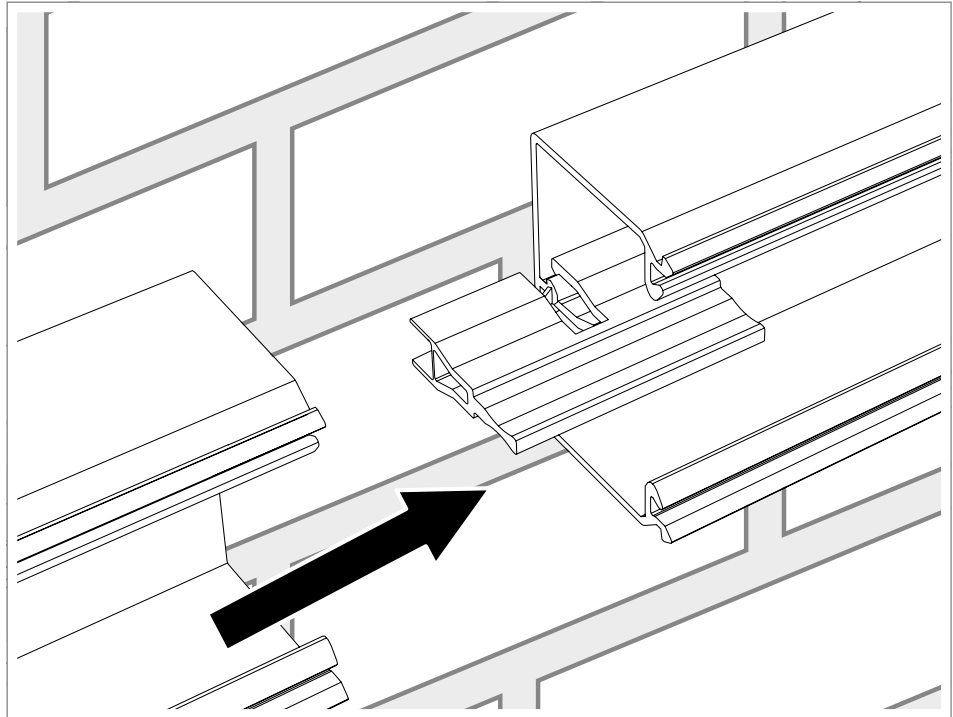

Fig. 10:   Mounting the WDK cable trunking

2. Push the WDK cable trunking ④ onto the mounting aid ⑱.
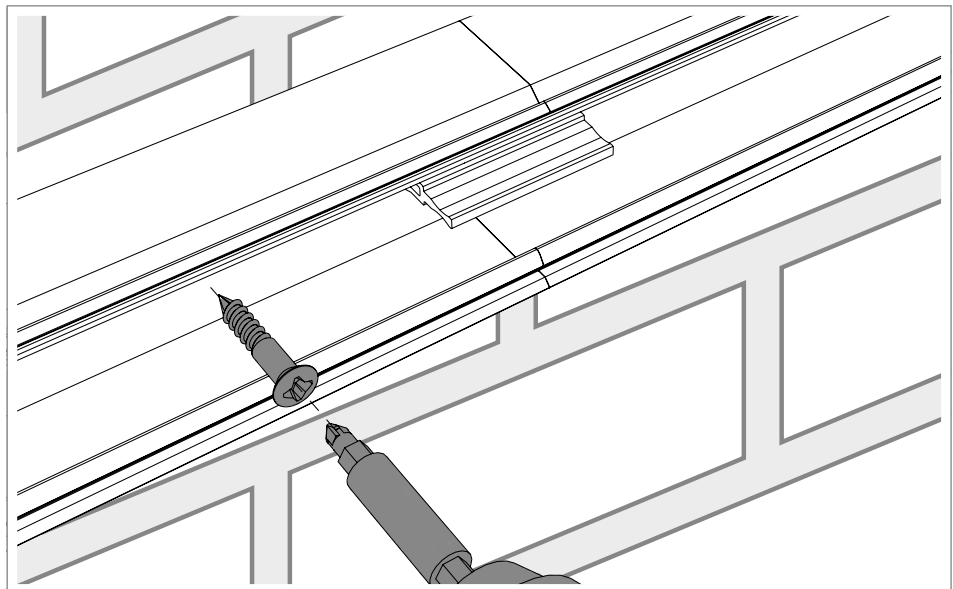

Fig. 11:   Screwing the WDK cable trunking tight

3. Screw the WDK cable trunking ④ tight.

4.2.2.2 Mounting accessories
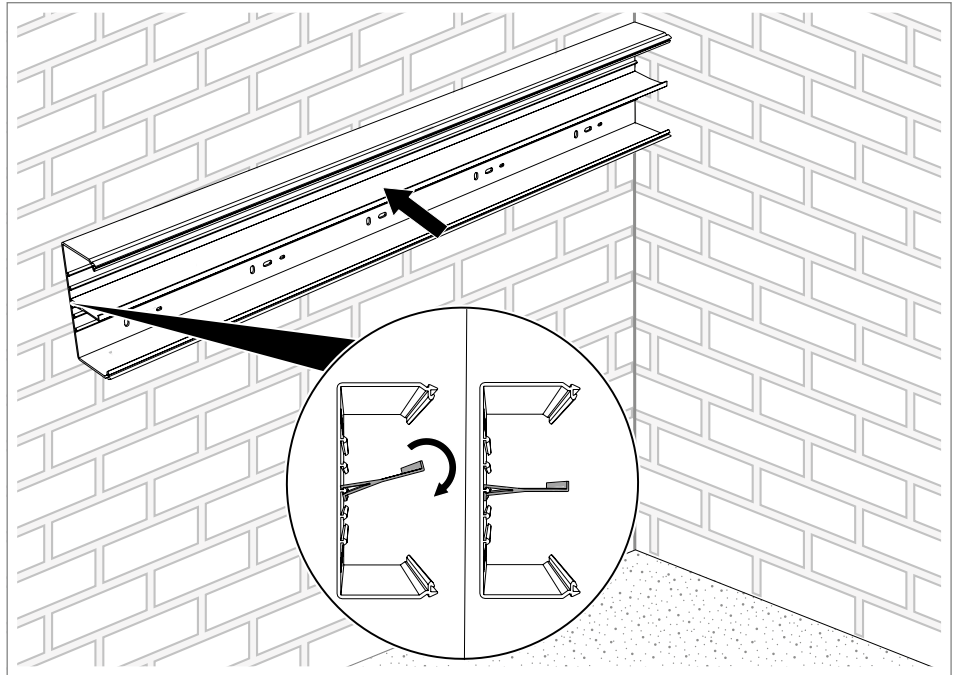

Fig. 12: Mounting the partition

4. Place the top locking lug of the partition ⑯ behind the mushroom profile. Then, engage the partition ⑯.
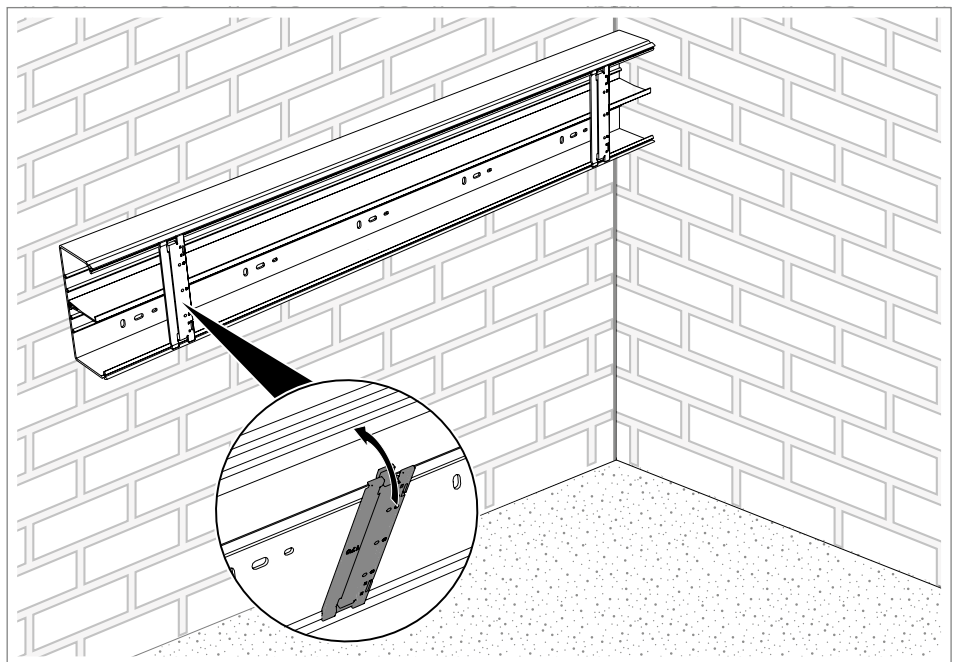

Fig. 13: Mounting cover clips

5. Snap the cover clips ② onto the bottom section of the WDK cable trunking at a 30° angle. Then, snap the cover clips ② in the top section.

6. Insert the cables in the WDK cable trunking ④.

As standard, from a trunking width of 60 mm, four cover clips of type

2370.. are snapped onto the base profile to retain the cables and fix the partition.

The cover clips are positioned freely on the locking contour of the trunking base and can be moved along the entire length of the trunking.

Note!   *The partition must have been mounted before the cover clips are mounted. Mounting them at a later time is very difficult.*

Damage to the cable routing system through raised junction boxes
The stability of the WDK cable trunking can be increased using the cover clips, although only to a certain extent. Only fill the WDK cable trunking with small cable loads when mounting them under the ceiling.
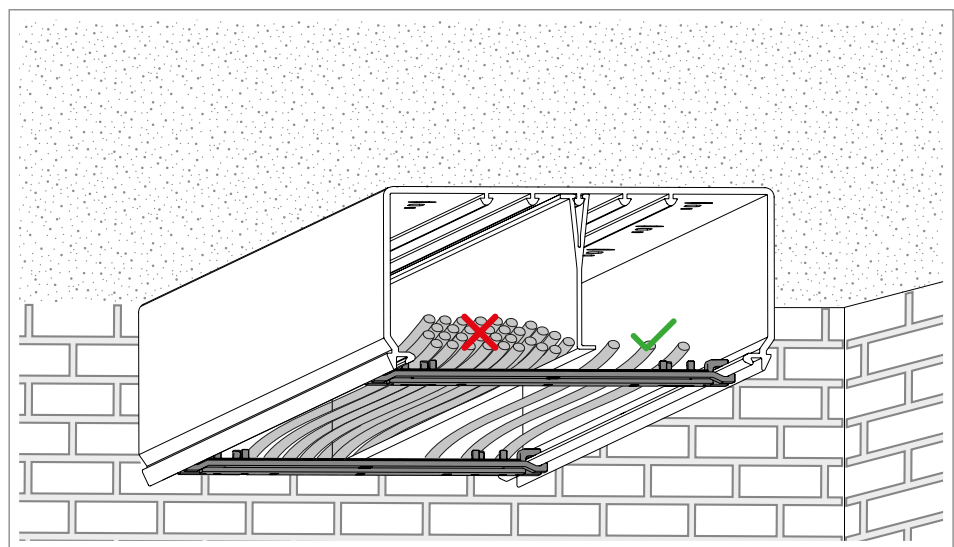

Fig. 14:   Mounting under the ceiling

7.   Only fill the WDK cable trunking ④ with small cable loads when mounting it under the ceiling or collect the cable weights with suitable means of fastening.
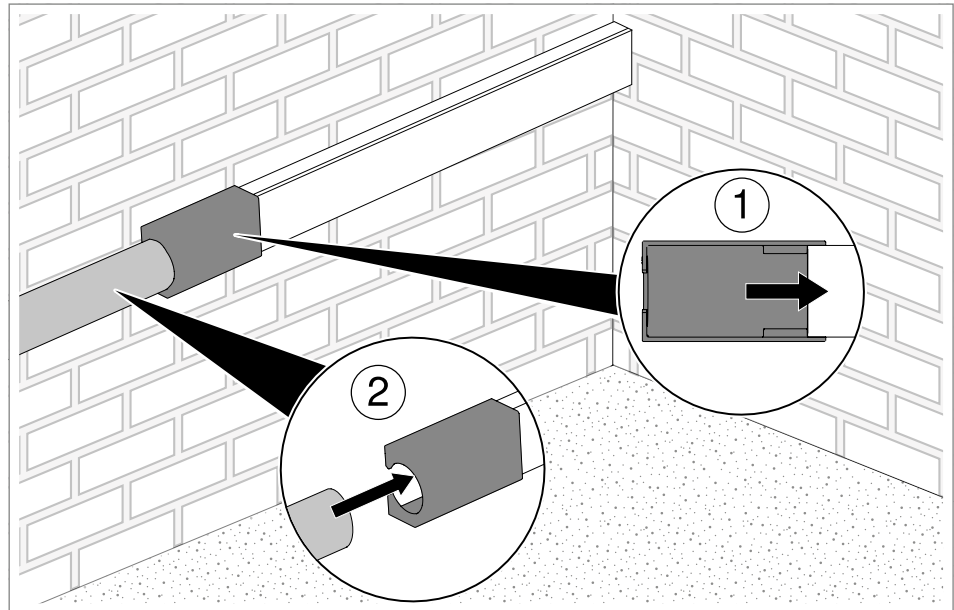

Fig. 15: Mounting the pipe adapter

Hinweis! *The pipe adapter can only be used in combination with the WDK cable trunking, type 13025.*

8. Attach the pipe adapter ⑨ to the end of the WDK cable trunking ④.

9. Snap the pipe into the pipe adapter ⑨.

4.2.2.3   Mounting accessories
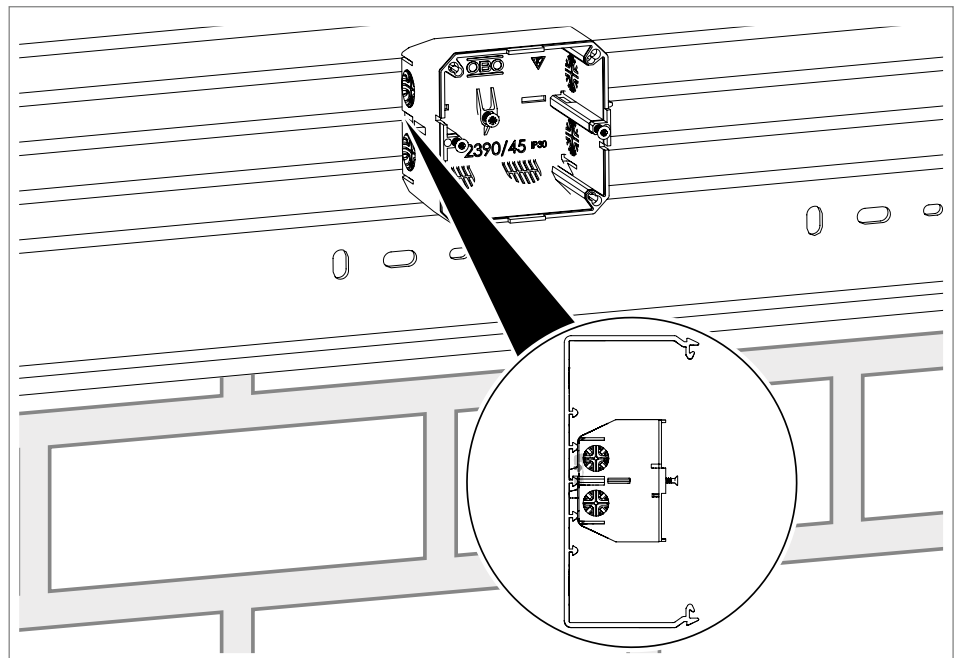

Fig. 16: Mounting the device installation socket for Schuko sockets

1. Snap the device installation socket for Schuko sockets ⑪ onto the mushroom profile in the base of the WDK cable trunking ④.
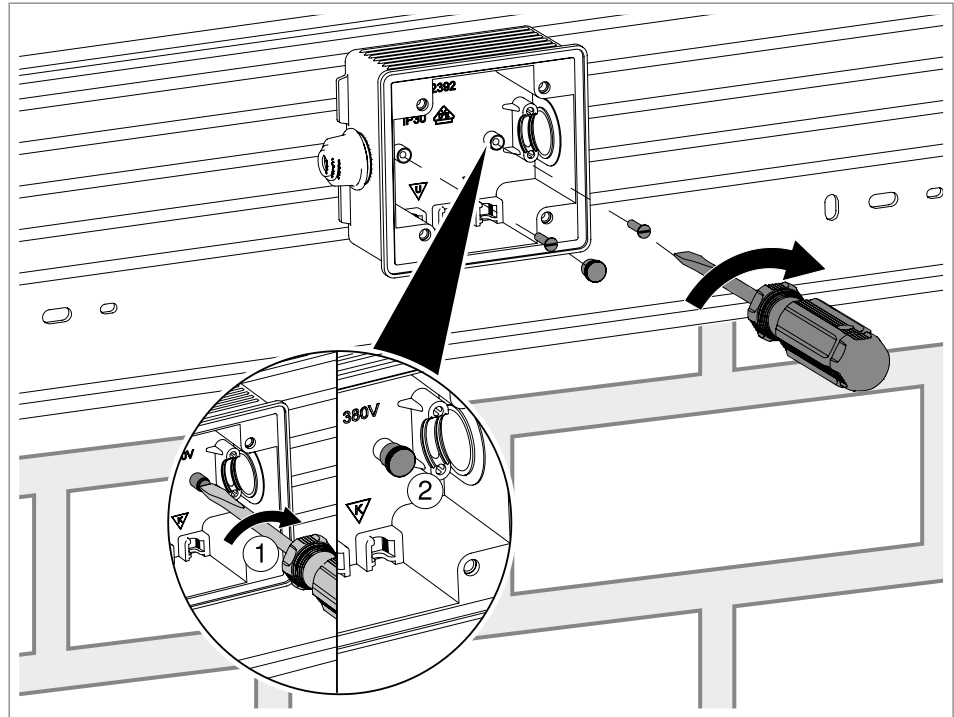

Fig. 17: Screwing on the device installation socket for Schuko sockets

2. Screw the device installation socket for Schuko sockets ⑪ tight in the base of the WDK cable trunking ④ using the pre-mounted screw.
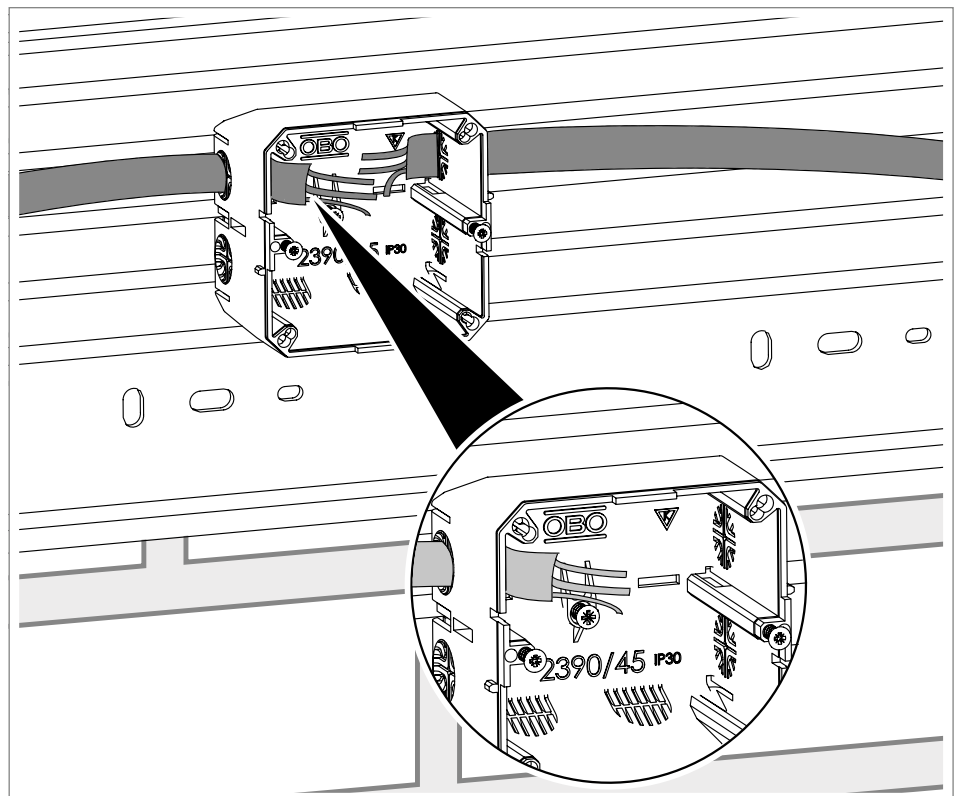

Fig. 18: Inserting the cable

3. Insert the cables in the device installation socket for Schuko sockets ⑪.
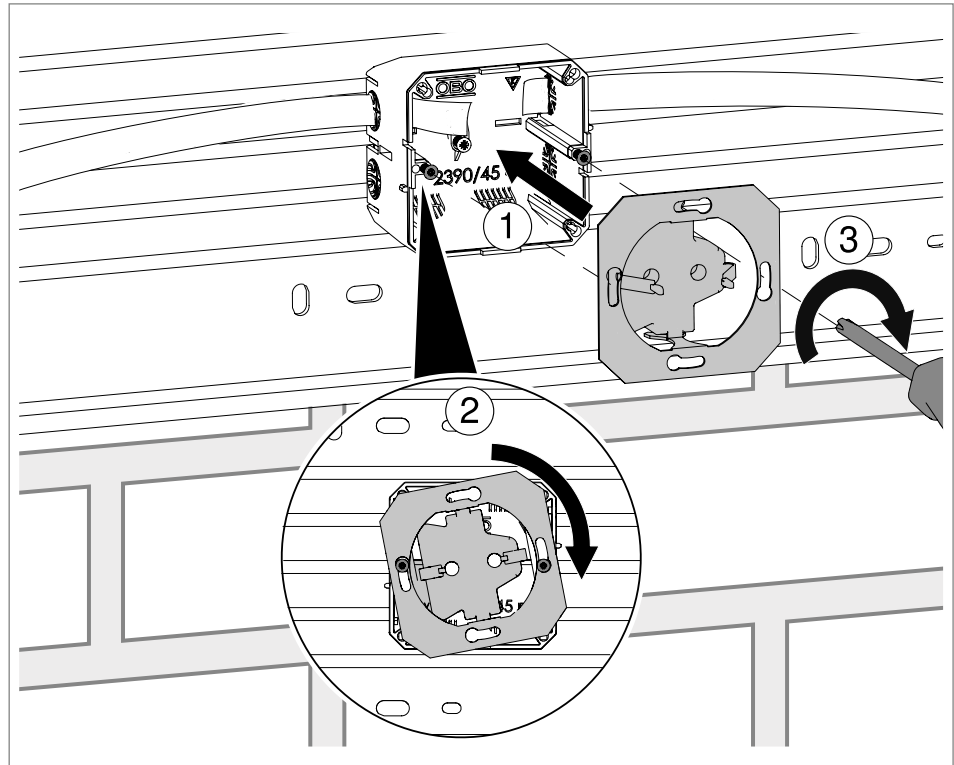

Fig. 19: Connecting the socket

⚠ **WARNUNG**	**Risk to life through electric shock!**
	Energised components! Electrical installation work may only be carried out by an electrical engineer.

4. Connect the socket and insert it into the device installation socket for Schuko sockets ⑪ (①).

5. Lock/turn the socket (②).

6. Screw the socket tight with the pre-mounted external screws (③).
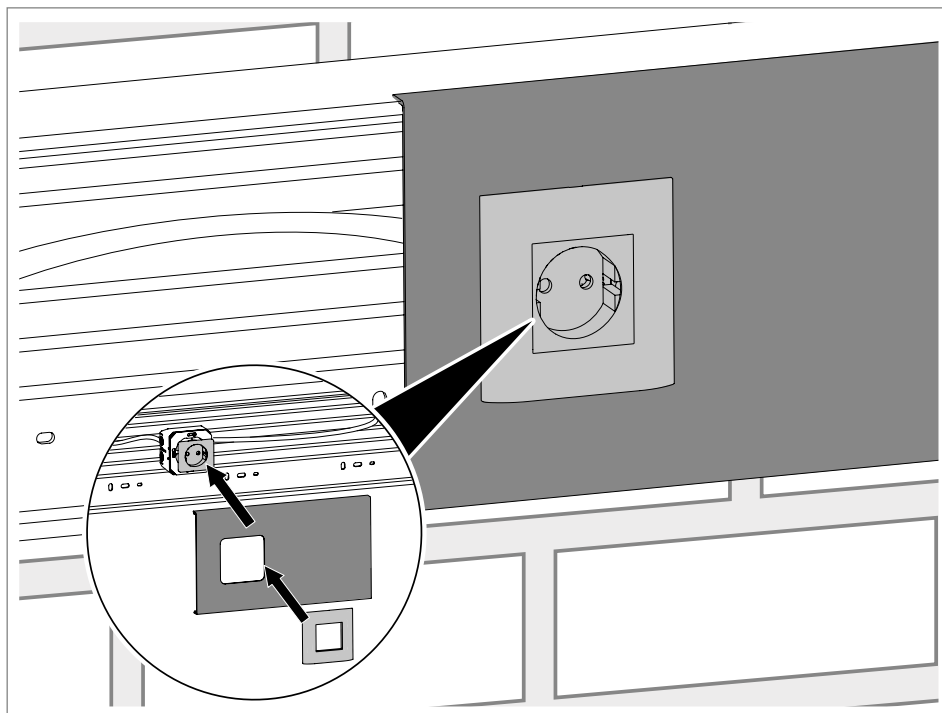

Fig. 20: Screwing on the device installation socket for Schuko sockets

7. Close the device installation socket for Schuko sockets ⑪ and WDK cable trunking ④ with the cover ⑫ and cover frame.

5.2.2.4 Mounting the CEE socket
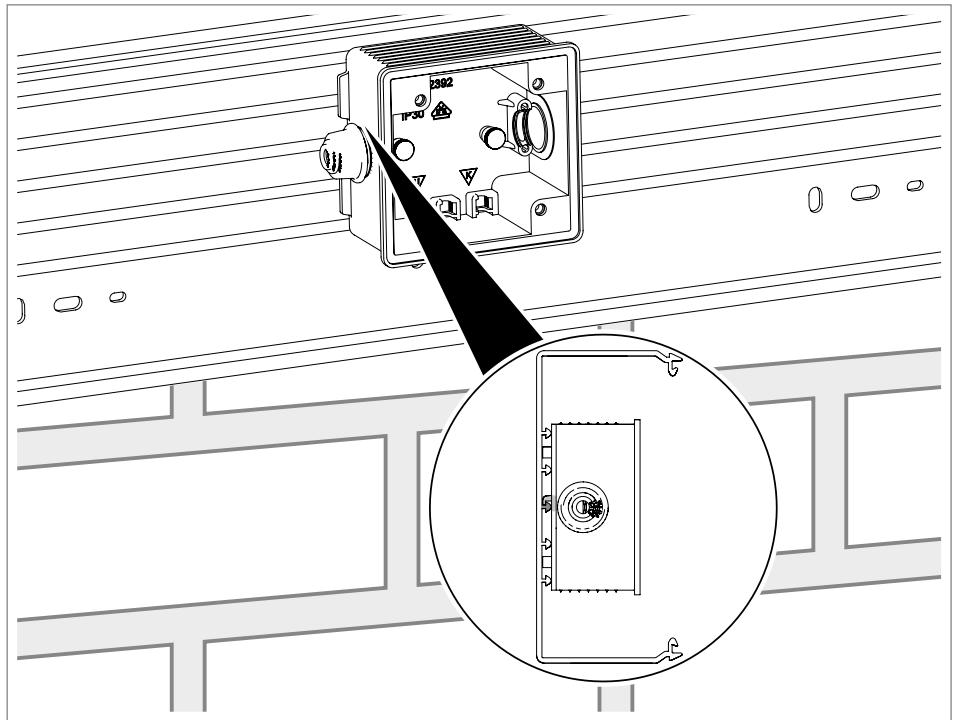

Fig. 21: Mounting the device installation socket for CEE sockets

1. Hang the device socket for CEE sockets ⑮ on the mushroom profile in the base of the WDK cable trunking ④.
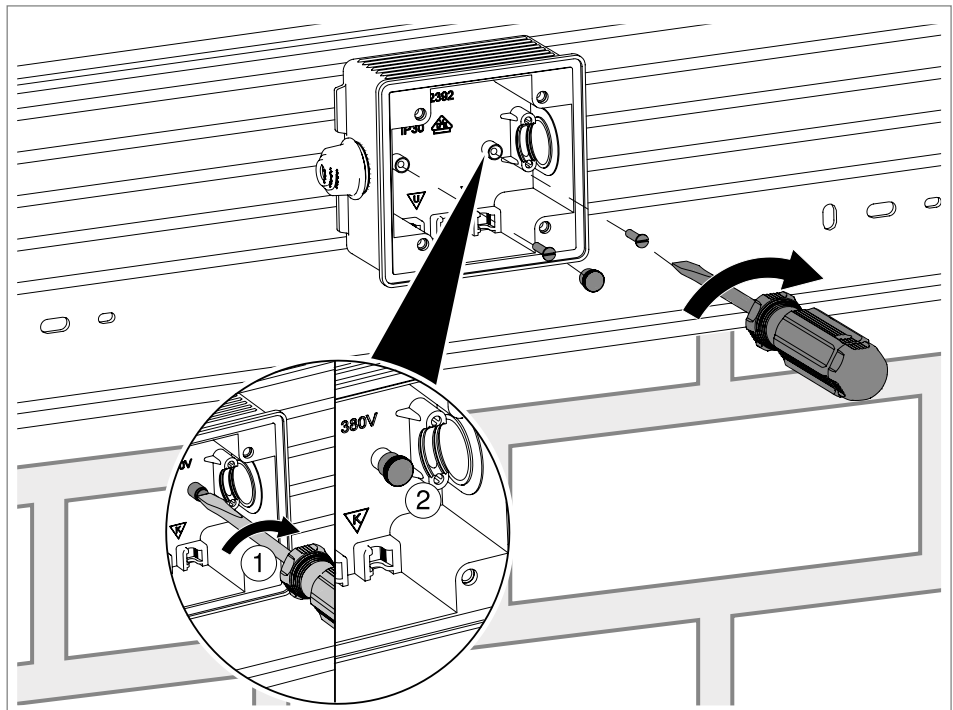

Fig. 22: Mounting the device installation socket for CEE sockets

2. Screw the device socket for the CEE socket ⑮ into the base of the WDK cable trunking ④ using the fastening screws.

OBO Bettermann
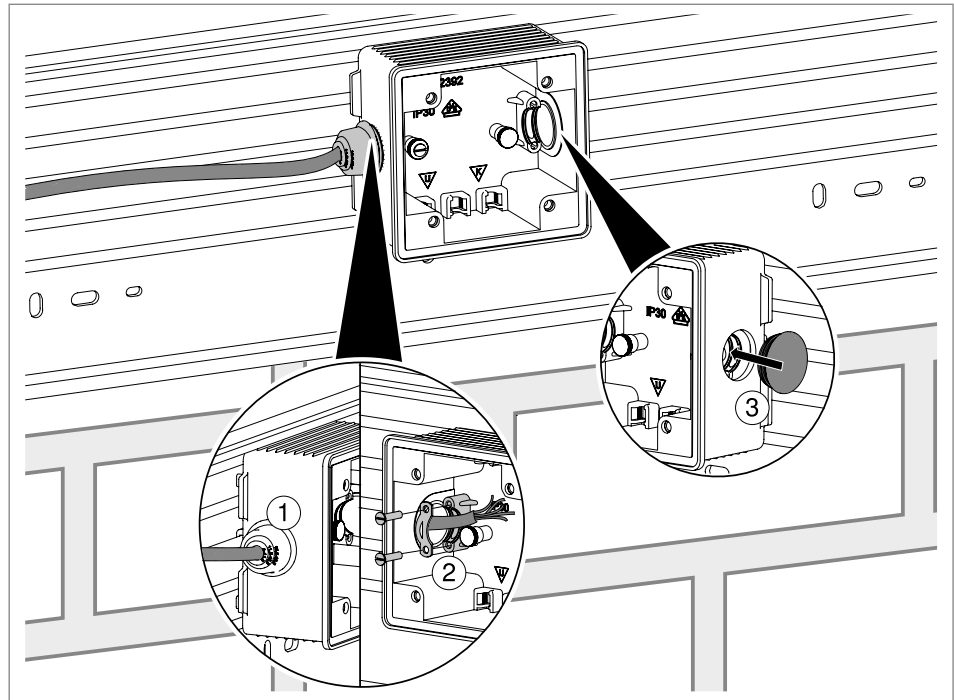

Fig. 23: Pulling in the cable

⚠ WARNUNG	**Risk to life through electric shock!** Energised components! Electrical installation work may only be carried out by an electrical engineer.

Note!

The 5-wire heavy current cable must be pulled up to 1 cm into the CEE device installation socket.

3. Pull the cables through the cable gland and into the device socket for CEE sockets ⑮.

4. Relieve the cable with the strain relief.

Note!

Optional, depending on the application:

5. Close the device socket for CEE sockets ⑮ on the other side with the screw plug.
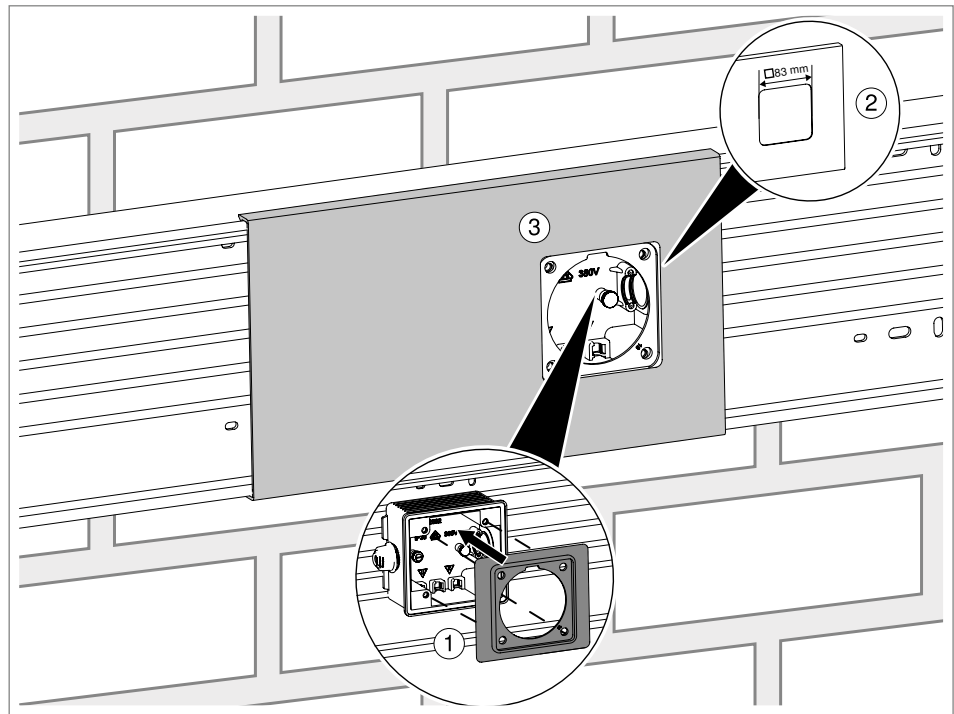

Fig. 24: Mounting the device socket for CEE sockets

6. Engage the adapter flange ⑭ on the device socket for CEE sockets
   ⑮.

7. Cut the cover 12 according to the dimensions for the device socket
   for CEE sockets ⑮ (☐ 83 mm).

8. Snap the cover ⑫ onto the WDK cable trunking ④.
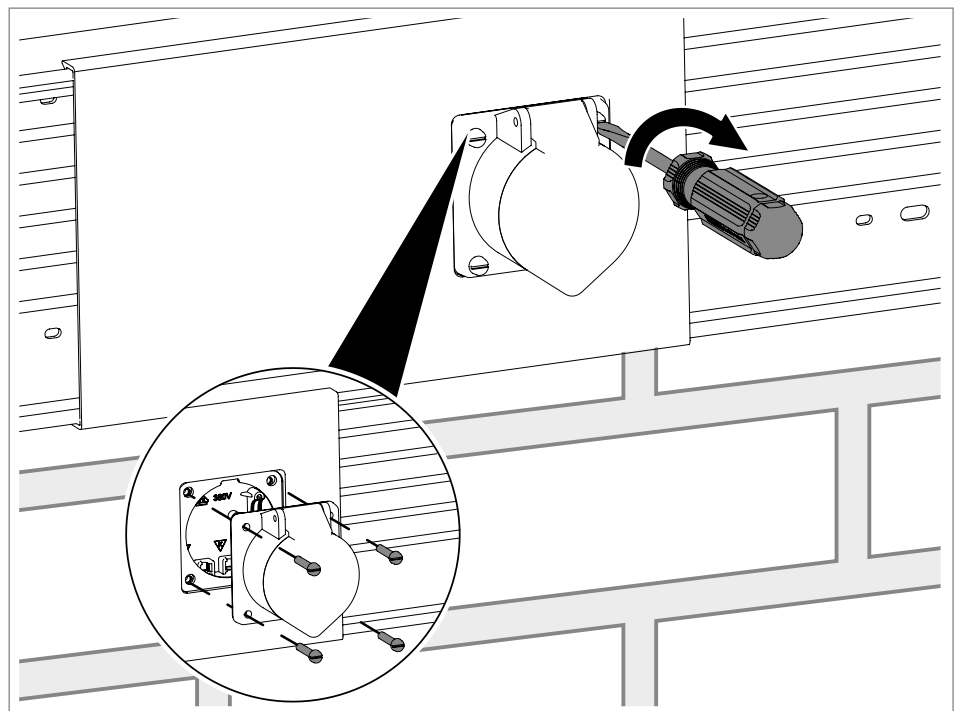

Fig. 25: Mounting the CEE connection unit

9. Screw the CEE connection device ⑬ tight with the adapter flange ⑭

and the fastening screws on the device socket for CEE sockets ⑮.

Mounting the device support

Single device support for mounting on WDK cable trunking of the types WDK 12022, WDK 15030, WDK15040 and WDK 20050. The device is suitable for accepting Modul 45® devices (sockets, data technology supports).
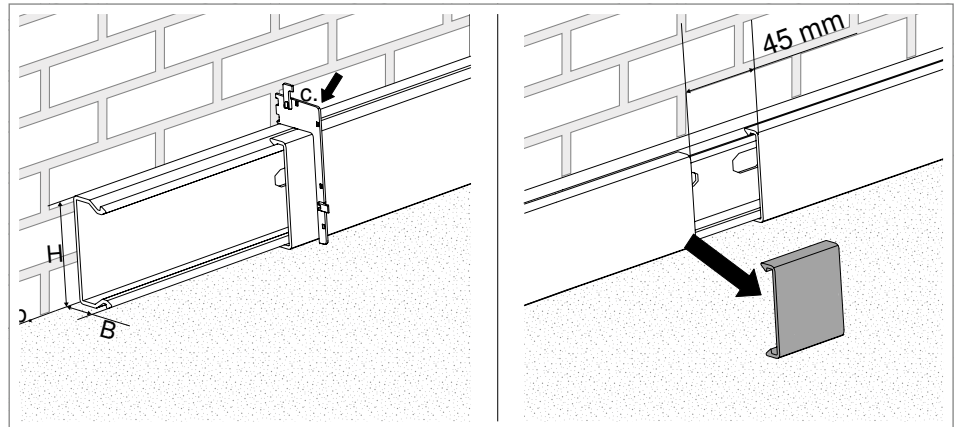

Fig. 26: Preparations for mounting

1. Determine the WDK cable trunking ④ type: The WDK cable trunking type can be determined in various ways:

   a Label on the packaging or on the trunking.

   b Measuring the width and height in comparison with the following table. Type height x width (mm)

Type	Height x width (mm)
WDK 12022	13 x 22 mm
WDK 15030	17.5 x 30 mm
WDK 15040	18 x 40 mm
WDK 20050	20 x 50 mm

Tab. 2: Comparison of the trunking types

   c Holding the appropriate adapter plate to the already installed WDK cable trunking.

2. Remove the cover ⑫ at the desired mounting position (opening: approx. 45 mm).
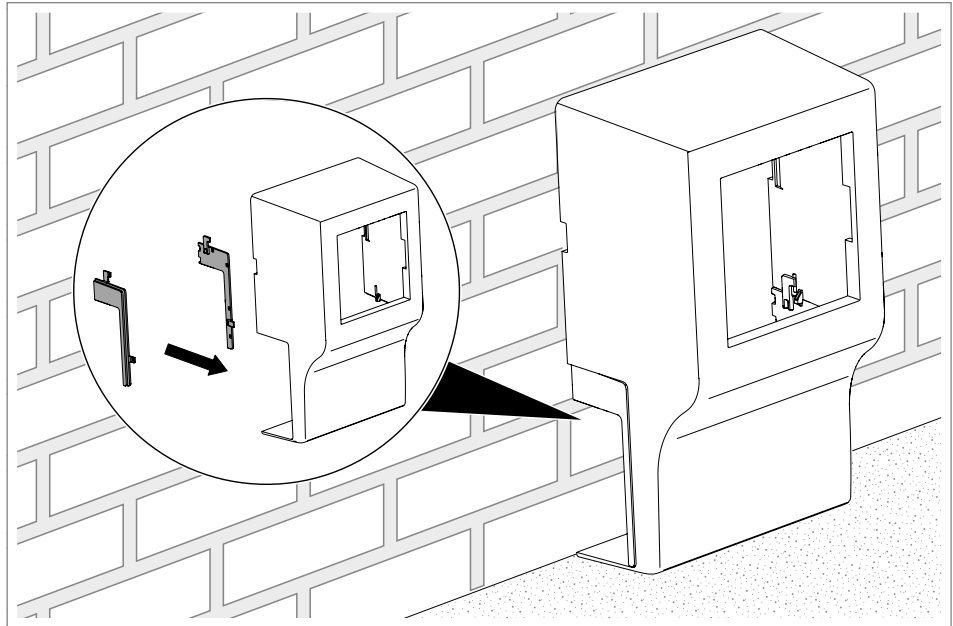

Fig. 27: Inserting the adapter plate

Note! *For correct assignment, the WDK type is specified on the inner side of the adapter plates.*

Note! *No adapter plate is required to mount the WDK20050 cable trunking.*

3. Insert the adapter plate for the selected WDK type in the cover.
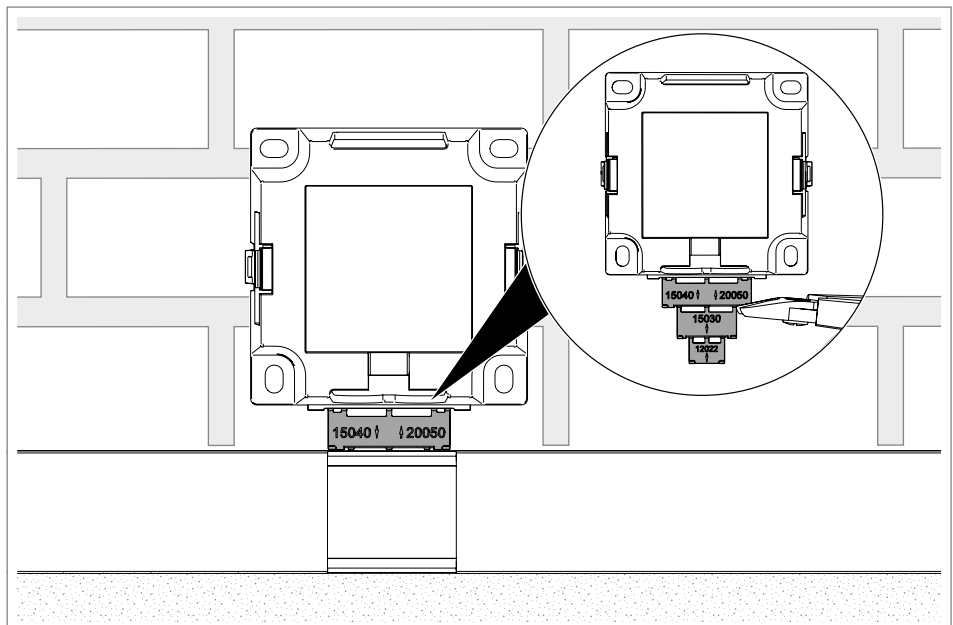

Fig. 28: Removing the spacer plate

4. Look for the spacer plate of the selected WDK type.

5. Using a suitable tool, cut the spacer plate on the perforation to which the arrow is pointing.

Note!   *In the example image, the adapter plate is cut for installation on the WDK type 15040.*
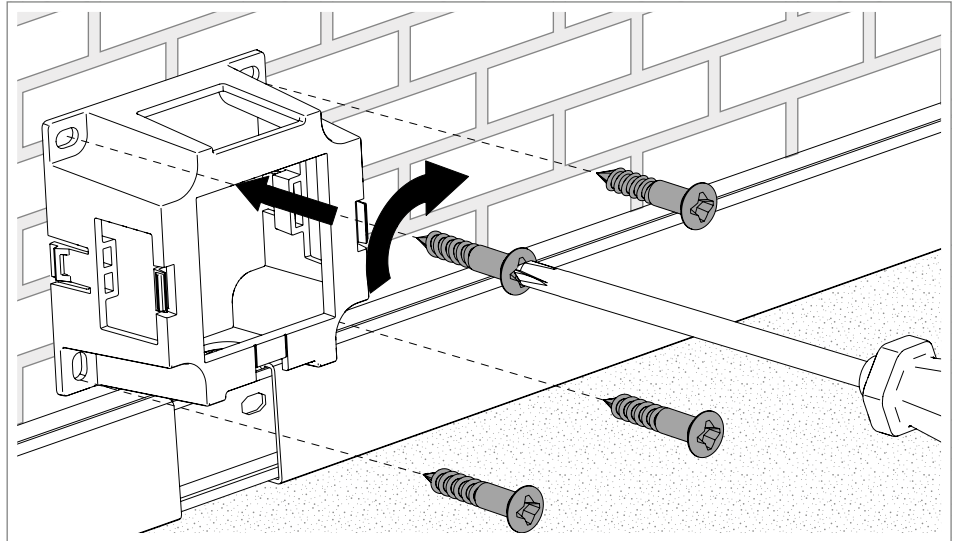

Fig. 29:   Mounting the basic body

6. Apply the basic body to the WDK cable trunking at the required mounting position using the spacer plate.

7. Mark the drill holes.

8. Pre-drill the drill holes.

9. Screw the basic body tight using a suitable fastening material.
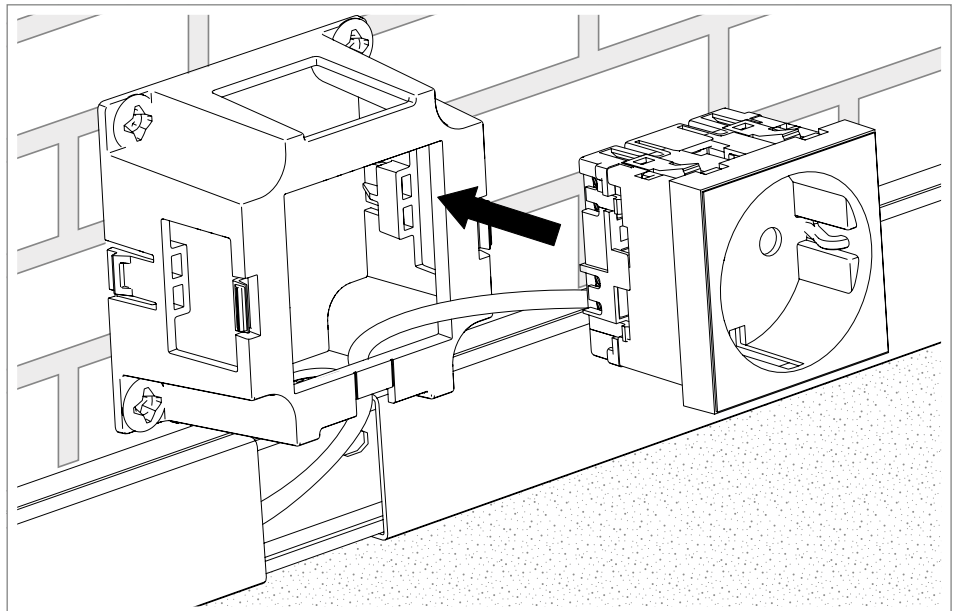

Fig. 30:   Installing the socket

⚠ **WARNUNG**   **Risk to life through electric shock!**
Energised components! Only trained electrical specialists may carry out electrical installation work.

10. Pull the cable through the basic body.

11. Connect the socket.

12. Engage the socket in the basic body.
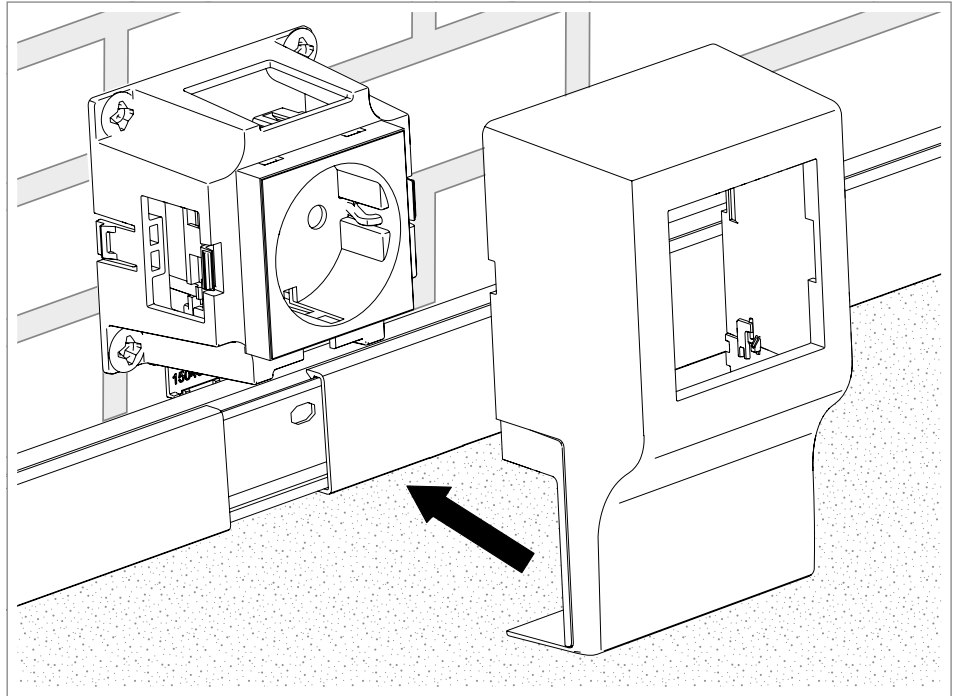

Fig. 31: Mounting the cover

13. Attach the cover to the basic body.
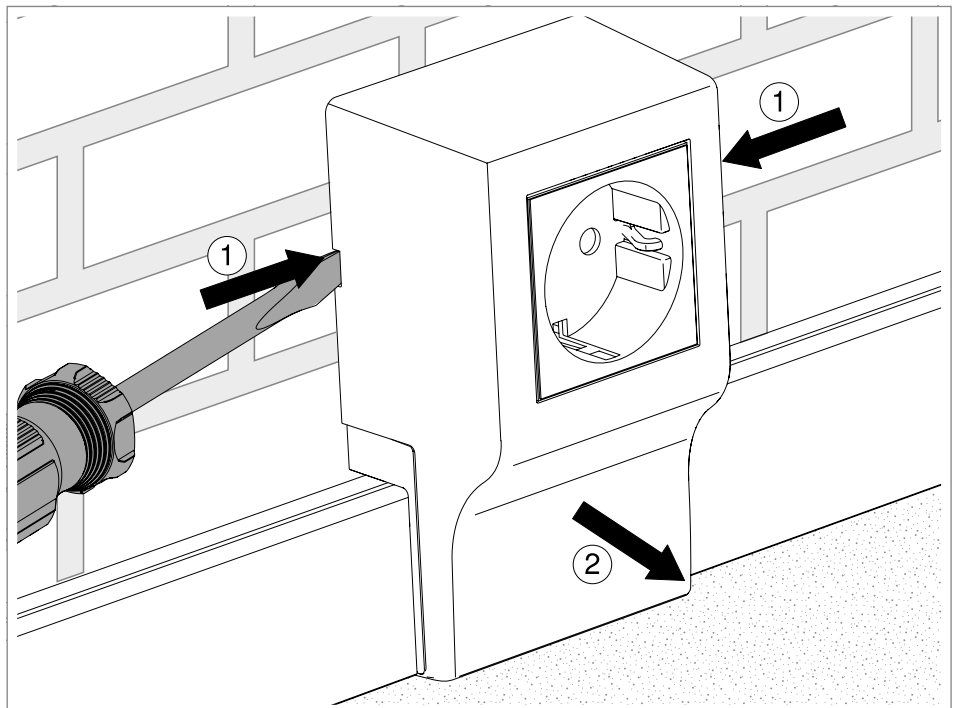

Fig. 32: Geräteträger demontieren

14. Insert the screwdriver in the side slots of the cover.

15. Remove the cover.

5.2.2.5   Mounting fittings
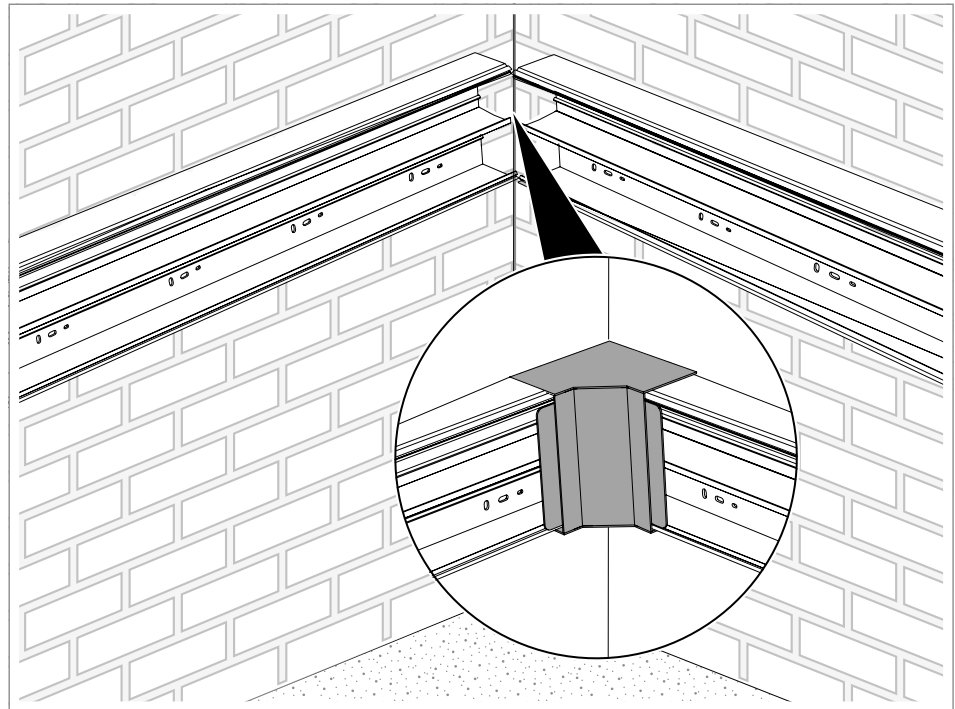

Fig. 33: Mounting the internal corner cover

1. Mount the WDK cable trunking ④ up to the end of the wall.

2. Attach the internal corner cover ⑤ over the mounted WDK cable trunking ④.

3. Snap the internal corner cover ⑤ into the cover contour.
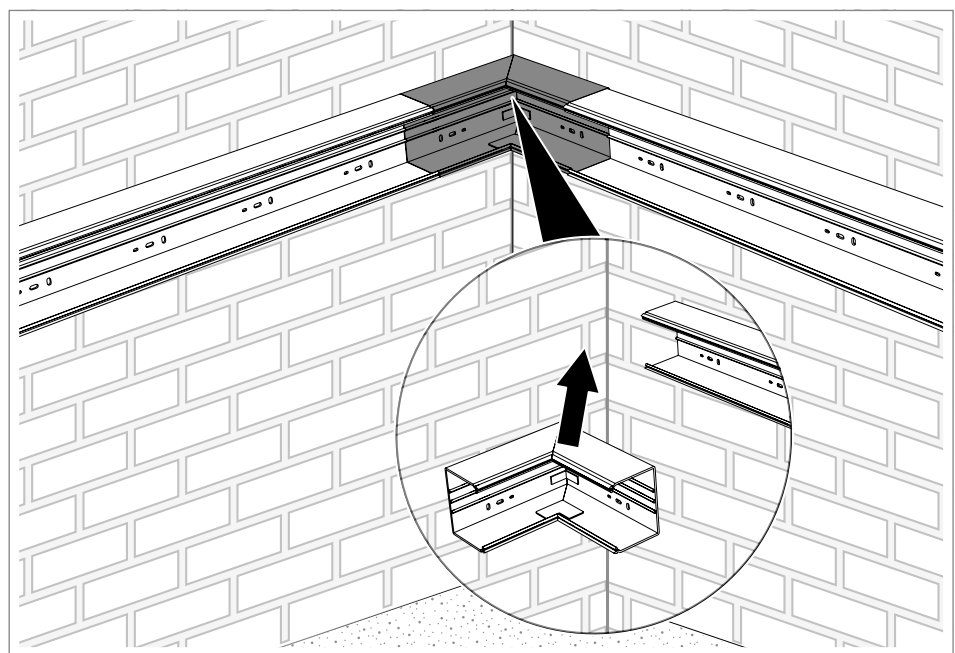

Fig. 34: Mounting an internal corner

---

4. Fasten the internal corner ⑤ to the wall in the slots using suitable fastening material (e.g. screw and anchor).

5. Mount the WDK cable trunking ④ flush to the internal corner ⑤.
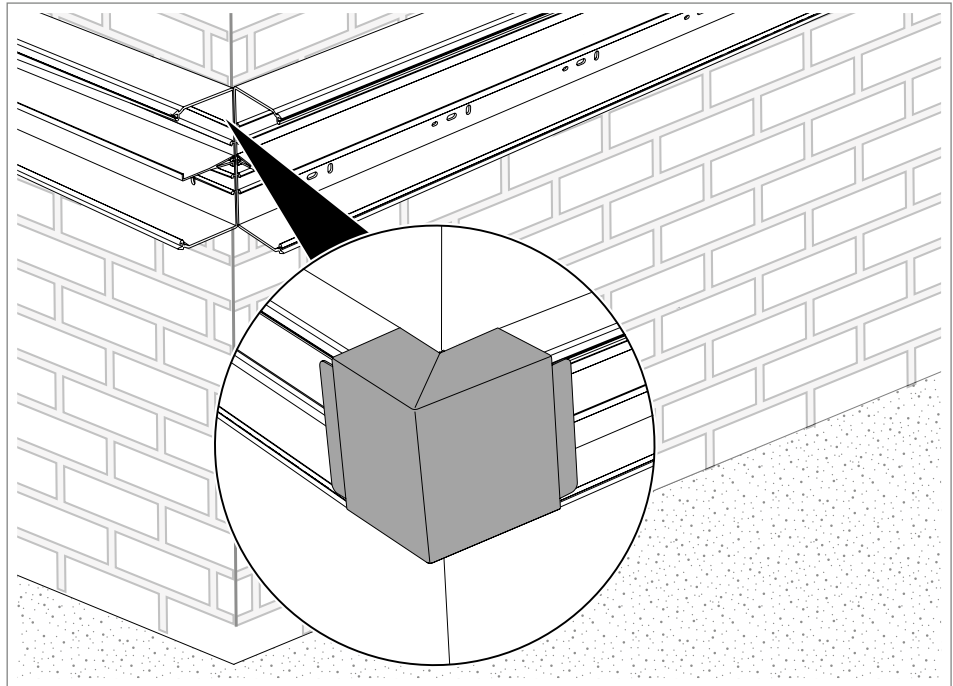

Fig. 35:   Mounting the external corner cover

6. Mount the WDK cable trunking ④ up to the end of the wall.

7. Attach the external corner cover ⑦ to the WDK cable trunking ④.

8. Snap the external corner cover ⑦ into the cover contour.
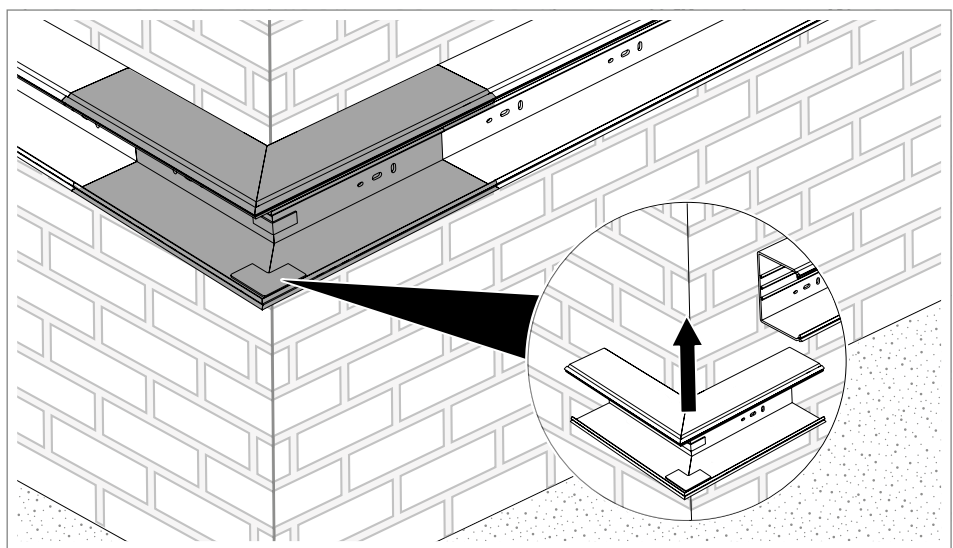

Fig. 36:   Mounting an external corner

9. Fasten the external corner ⑦ to the wall in the slots using suitable fastening material (e.g. screw and anchor).

10. Mount the WDK cable trunking ④ flush to the external corner ⑦.
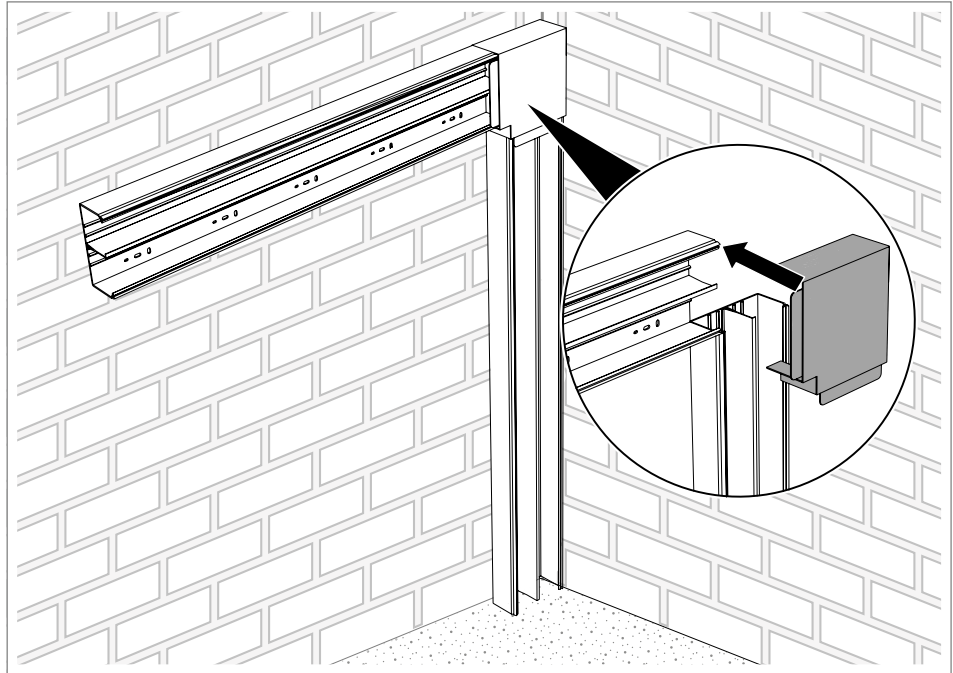

Fig. 37: Mounting a flat angle cover

11. Mount the WDK cable trunking ④ at a 90° angle.

12. Attach the flat angle cover ⑩ to the WDK cable trunking ④.
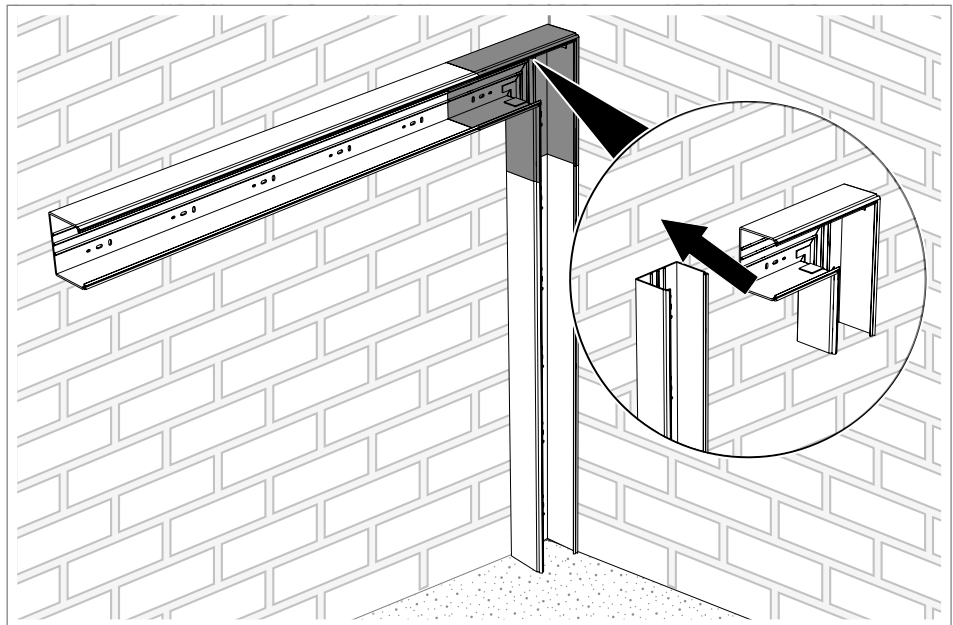

Fig. 38: Mounting flat angles

13. Fasten the flat angle ⑩ to the wall in the slots using suitable fastening material (e.g. screw and anchor).

14. Mount the WDK cable trunking ④ flush to the flat angle ⑩.
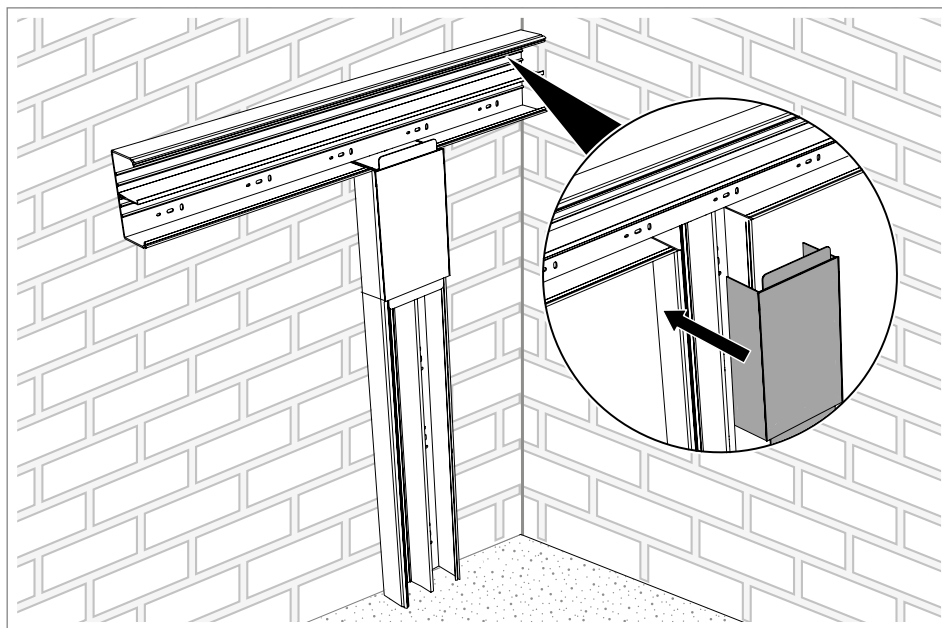

Fig. 39: Mounting a T and cross piece

15. Attach the T and cross piece ③ to the WDK cable trunking ④.
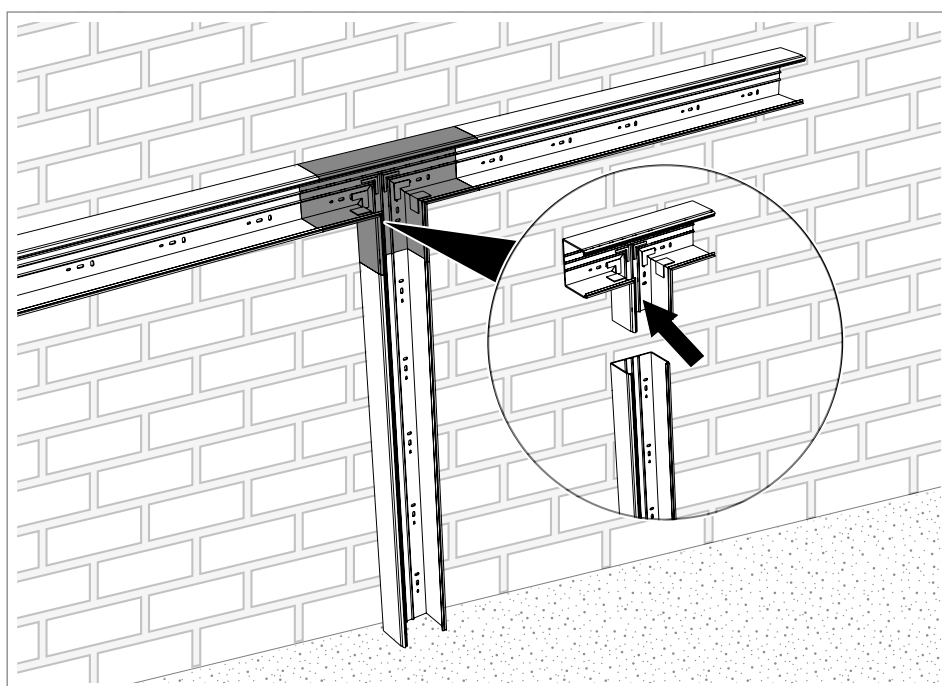

Fig. 40: Mounting the T piece

16. Fasten the T piece ③ to the wall in the slots using suitable fastening material (e.g. screw and anchor).

17. Mount the WDK cable trunking ④ flush to the T piece ③.
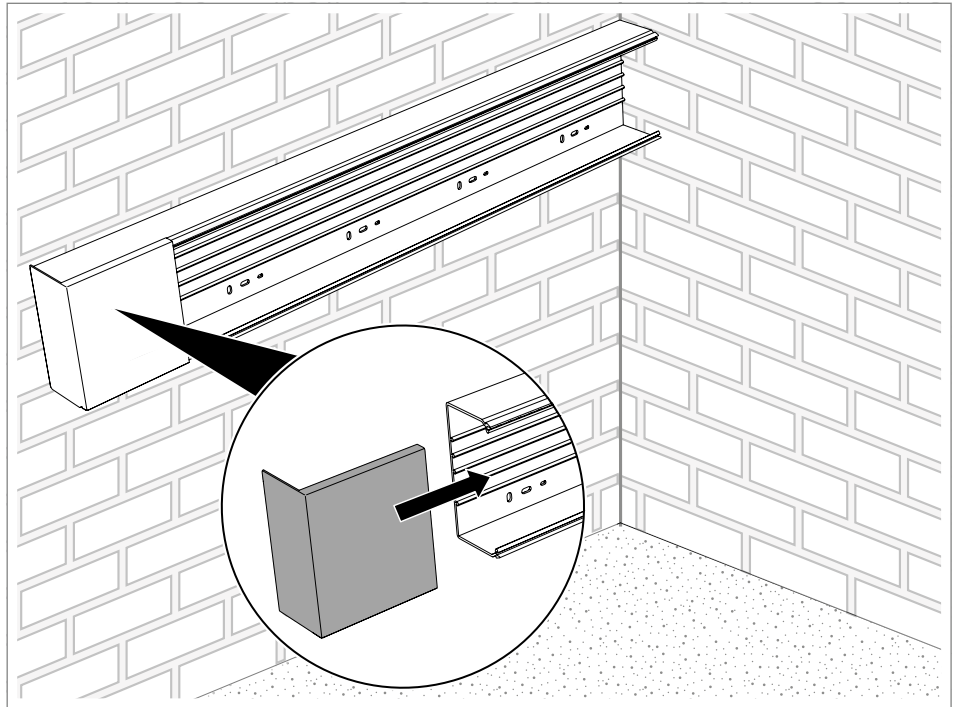

Fig. 41: Mounting an end piece

18. Snap the end piece ❶ sideways onto the mushroom profile in the
    base of the trunking.
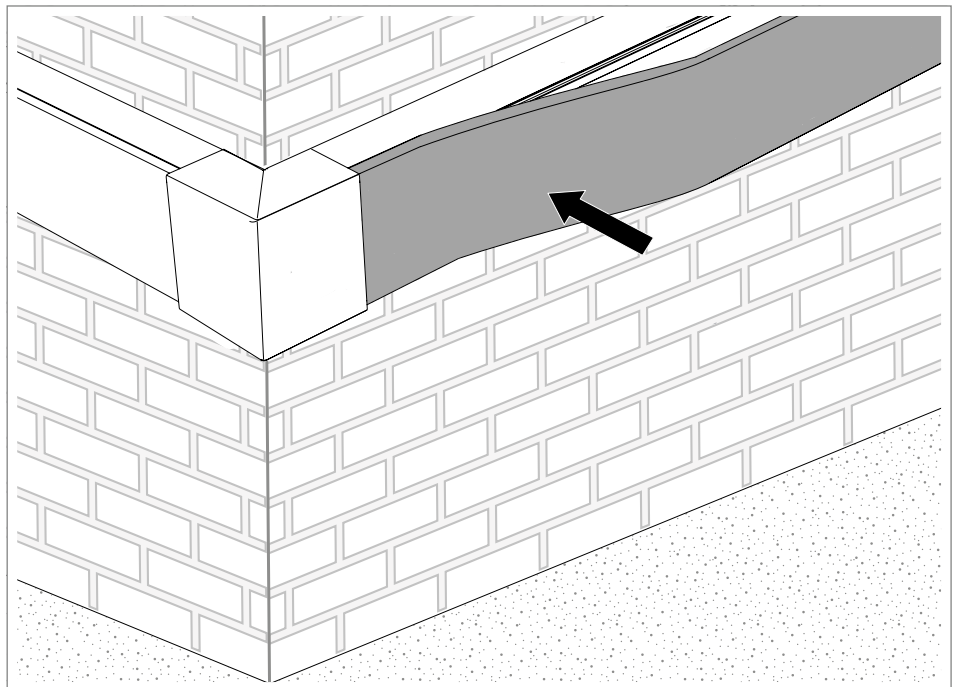

Fig. 42: Mounting the cover

Note!   *The covers are designed to overlap. You can snap the covers over the
              external locking contour of the WDK cable trunking.*

19. Snap the covers ⑫ into the cover contour of the WDK cable trunking
    ❹.
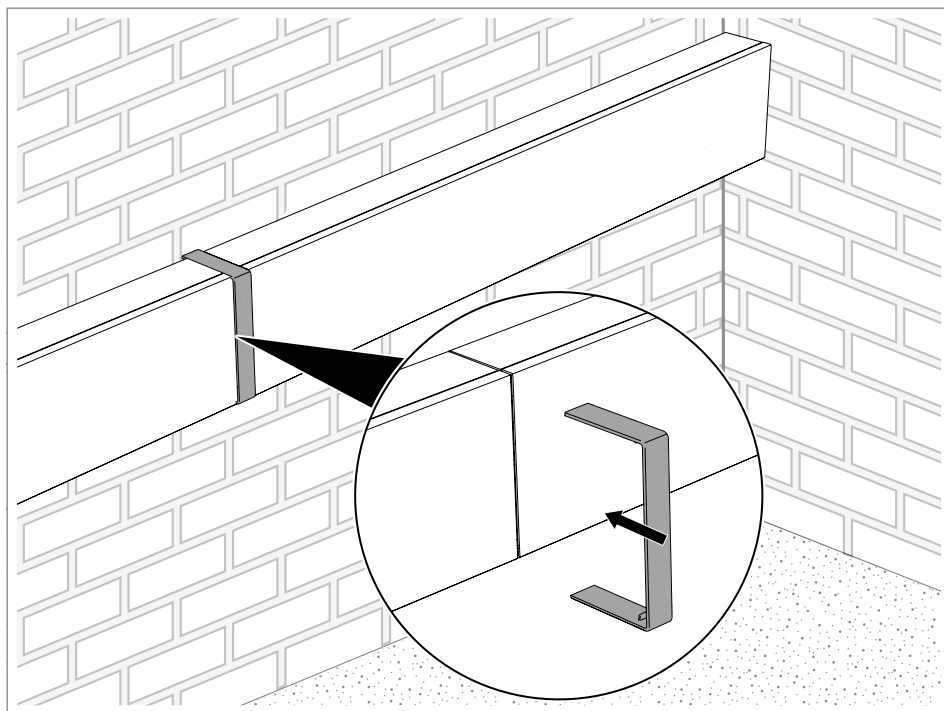

Fig. 43:   Mounting the joint cover

Note!   *Mounting the joint cover increases ingress protection.*

20. Snap the joint covers ⑥ onto the interface between the WDK cable
    trunking ④ using the adhesive film.

5.3 Mounting the WDK universal trunking

5.3.1 System description
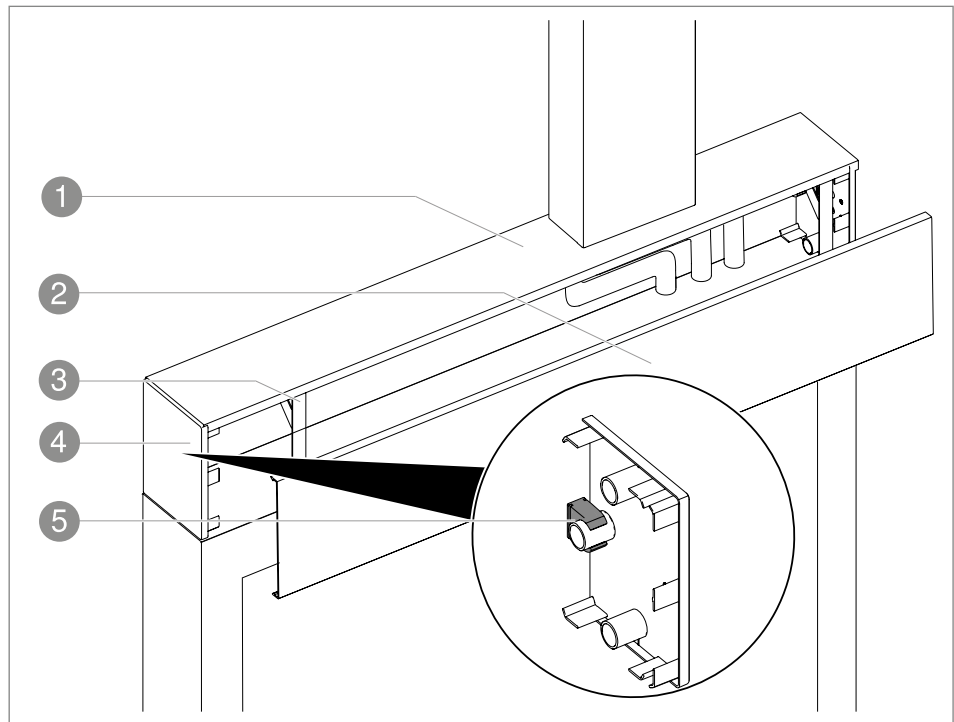

Fig. 44: Universal trunking

Note! *The universal trunking hides cables which have to, for example, be inserted into meter cabinets.*

The universal trunking is a visual cover to hide the cables in the surface-mounted distributor.

– ❶ Cover

– ❷ Front cover

– ❸ Cover clips

– ❹ End piece

– ❺ Fastening clip

5.3.2 Mounting the universal trunking
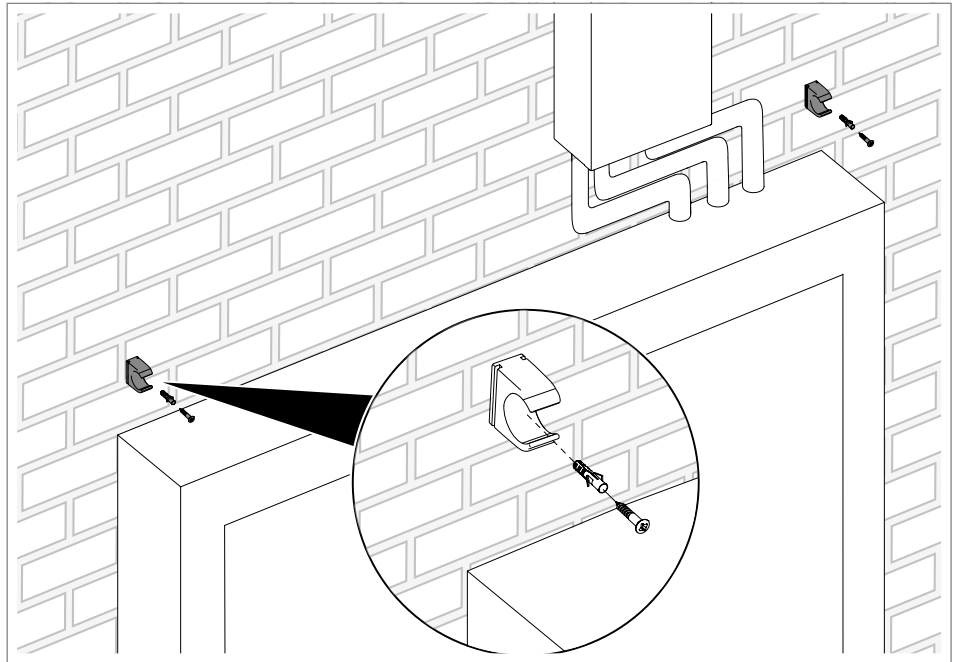

Fig. 45: Mounting fastening clips

1. Using knock-in anchors, mount the fastening clips ⑤ on the left and right above the distributor cabinets.
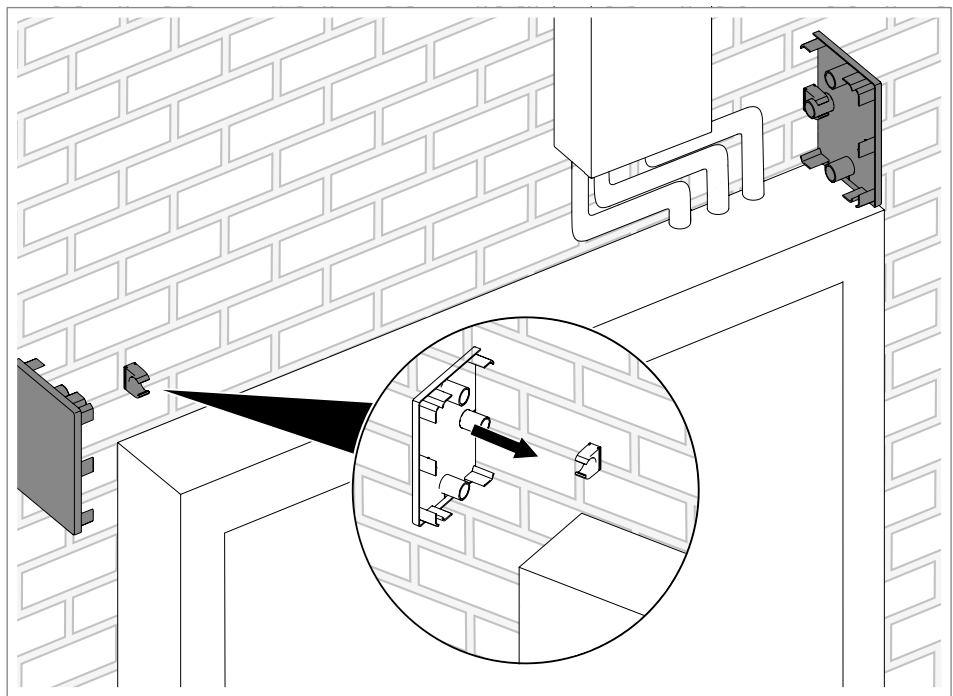

Fig. 46: Mounting end pieces

2. Snap the end pieces ④ into the fastening clips ⑤.
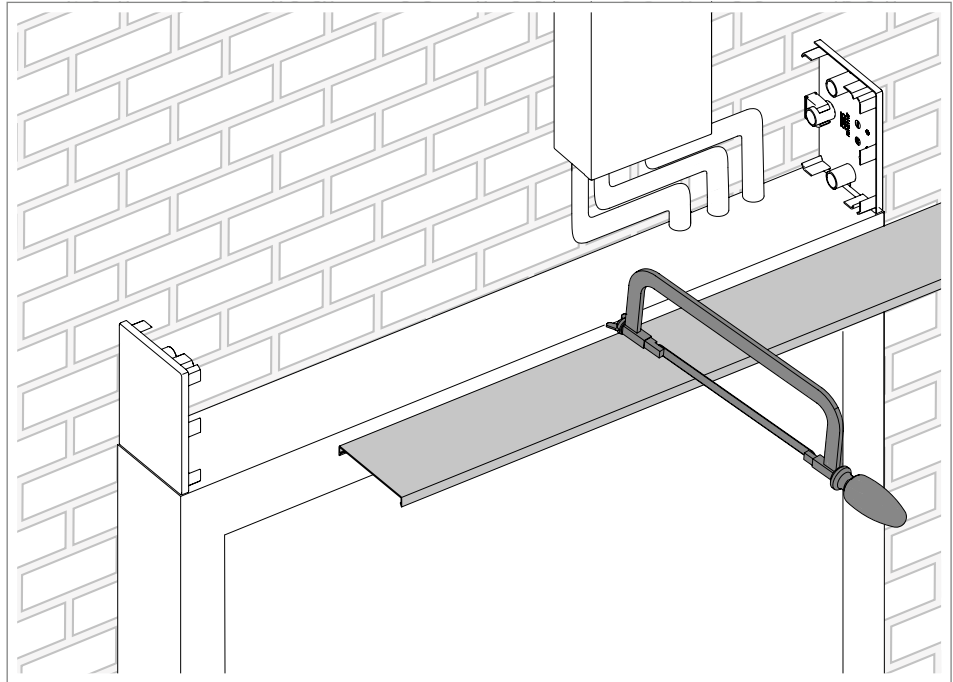

Fig. 47: Cutting covers

3. Adjust the covers ❶ to the desired length using a suitable tool (e.g. coping saw).
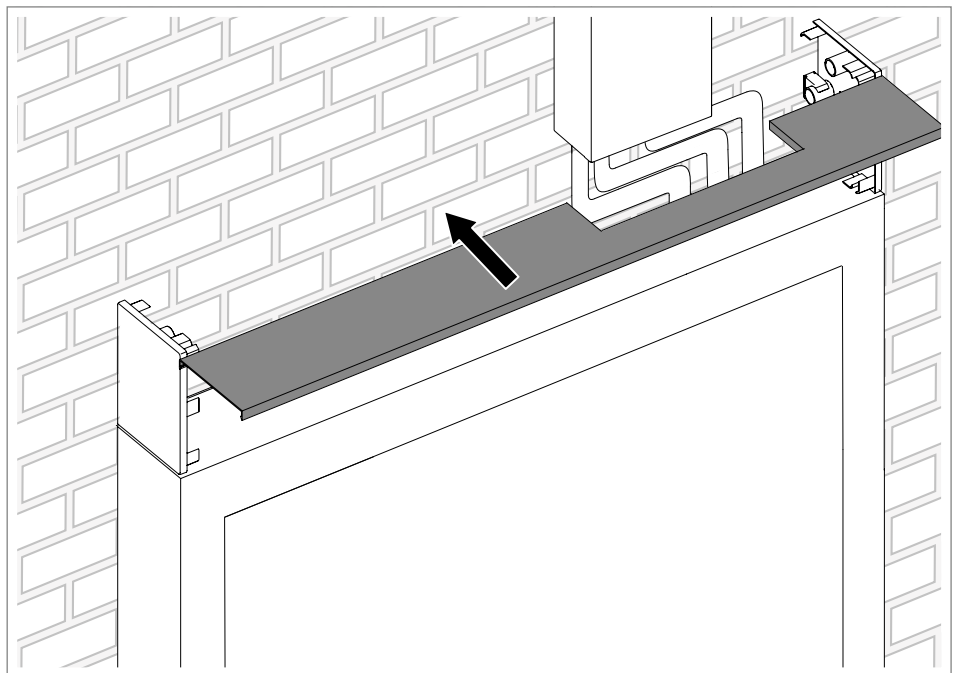

Fig. 48: Installing covers

4. Snap the covers ❶ into the cover contour of the end pieces ❹.
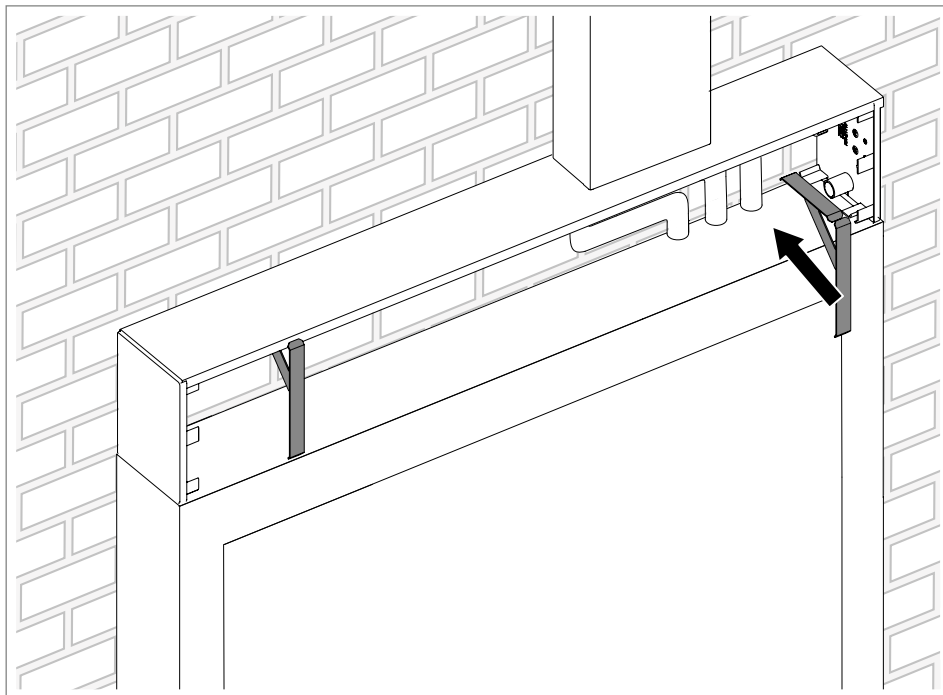

Fig. 49: Mounting cover clips

5. Clamp the cover clips ❸ between the power unit and the cover ❶.
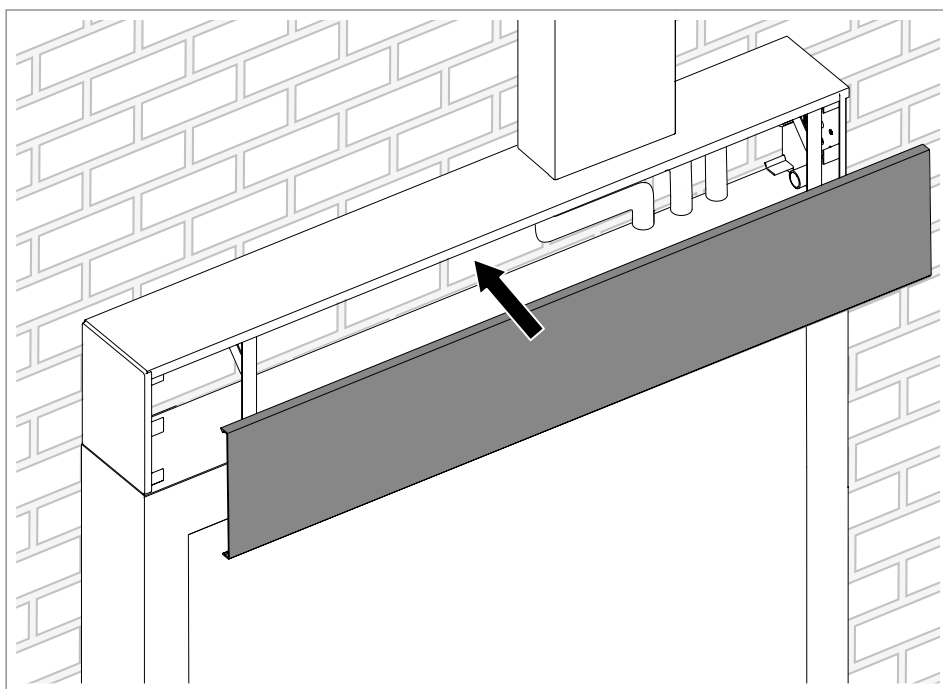

Fig. 50: Mounting the front cover

6. Attach the front cover ❷ onto the cover clips ❸.
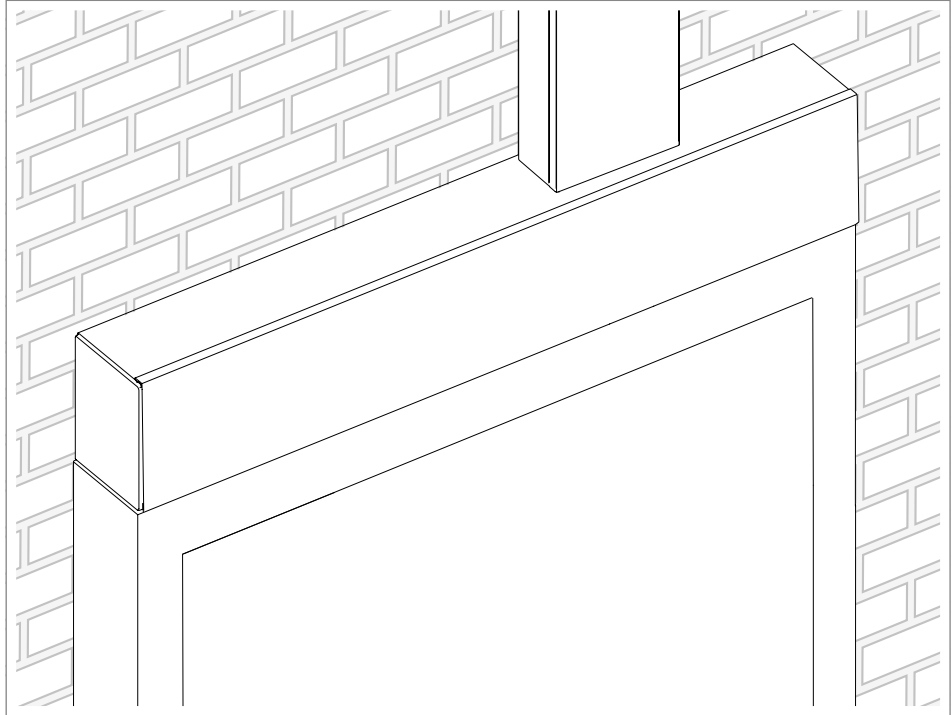

Fig. 51: Universal trunking

The universal trunking allows tidy routing, even if a lot of cables need to be hidden.
